Digital Wars Charles Arthur, 2012-03-03 Which of Apple Google and Microsoft had an office with a drawer of broken dreams and what real objects lay inside it When did Microsoft have the chance to catch Google in making money from search and who vetoed it Why did Google test 40 shades of blue on its users How long did outside developers wait before asking to write apps for Apple's iPhone after Steve Jobs announced it Who said that Microsoft should have its own music player and why did it fail The answers and much more can be found in this new book by Charles Arthur technology editor of The Guardian newspaper of London *Digital Wars* starts in 1998 when the internet and computing business was about to be upended by an antitrust case a tiny start up and a former giant rebuilding itself It looks at what are now the three best known tech companies and through the voices of former and current staff examines their different strategies to try to win the battle to control the exploding network connecting the world Microsoft was a giant soon to become the highest valued company in the world while Apple was a minnow and Google just a startup By February 10 2012 Apple was worth more 462bn than both Microsoft 258bn and Google 198bn combined The chance had come from tumultuous battles between the three To win their battles Apple used design the vertical model of controlling the hardware and software and a relentless focus on the customer to the exclusion of others Microsoft depended on the high quality of its employees programming skills and its monopolies in software to try to move into new markets such as search and music Google focused on being quick efficient and using the power of data analysis not human taste to make decisions and get ahead of would be rivals With exclusive information from interviews with people such as Don Norman former VP of Apple Computer and Pieter Knook former SVP of the Mobile Communications Business at Microsoft and many more current and former staff of the three companies including one person who has worked for all three Arthur also addresses what the inventors of the hard drive used

The Mobile Photographer Robert Fisher, 2014-11-17 It's been said that with smartphones everyone is a photographer. There is a snide implication with that statement that camera phones aren't real cameras and that the people who use them aren't real photographers. In this book Robert Fisher proves that today's Android devices offer cameras that are remarkably powerful and more than capable of producing images that rival those made with more serious equipment. In this book Fisher guides readers through the menus of the Android operating system helping them to understand how to choose and use out of the box controls for better images. Next he covers add on accessories and applications designed to enhance the devices capabilities. While the photographic capabilities of the base camera are pretty terrific and will meet with rave reviews from many users the camera really produces images that sing when suited up with DSLR functions filters and postproduction effects all of which Fisher covers with prowess and technical skill.

Conservation Technology Serge A. Wich, Alex K. Piel, 2021-08-31 The global loss of biodiversity is occurring at an unprecedented pace. Despite the considerable effort devoted to conservation science and management we still lack even the most basic data on the distribution and density of the majority of plant and animal species which in turn hampers our efforts to study changes over time. In addition we often lack behavioural data from the very animals most influenced by environmental changes this is largely due to the financial and logistical limitations associated with gathering scientific data on species that are cryptic widely distributed range over large areas or negatively influenced by human presence. To overcome these limitations conservationists are increasingly employing technology to facilitate such data collection. Innovative solutions have been driven by dramatic advances in the conservation technology interface. The use of camera traps acoustic sensors satellite data drones and computer algorithms to analyse the

large datasets collected are all becoming increasingly widespread Although specialist books are available on some of these individual technologies this is the first comprehensive text to describe the breadth of available technology for conservation and to evaluate its varied applications bringing together a team of international experts using a diverse range of approaches Conservation Technology is suitable for graduate level students professional researchers practitioners and field managers in the fields of ecology and conservation biology

Roberts, 2014-01-10 If you read technology news you ll notice it s not just a story of amazing new product introductions or even that plus copycat product introductions All the usual aspects of business are there fierce competition new contenders old survivors great ideas but business failures mediocre ideas that somehow seem to succeed and prosper As a reporter commentator and blogger on mobile technology I ve collected what happened in the industry in 2013 and make predictions on what will and won t happen in 2014 You can read what did happen in the mobile technology in 2013 Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement This way you can dive into any detail level you desire read my news feed for the overview or follow the related web link to the longer article History is moving so fast now that it is all recorded electronically but I m surprised no one else has collected it and presented it for consideration Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed It s often overlooked that the technology industry is an industry By that I mean its main concerns are profit and growth As consumers we love the new products and unique abilities we are gaining from technology but it is a business akin

to any other trying to seduce us to pry money out of our wallets So I cover the horse race aspect of the business who s up who s down Is that changing Is that likely to change The longer implications of what the technology industry is doing are vast and social We are moving to an always on always connected society where we can communicate with someone instantly and find an answer to any question quickly The entire database of human knowledge is now available in the palm of your hand whenever you desire it Everything is there the good the bad right and wrong hate and love music and noise We are obsessed with technology not in and of itself but as a means to an end Technology is the means to satisfy our curiosity or even our desire for self expression We are taking photos machine gun style with our smartphones and choose the few to share As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years He gave some boring answer about Moore s Law but the real answer is that computers are in their teenage years They are growing and growing They will not always do so So too the technology industry is in a state of rapid change I see the shift to smaller devices as a new paradigm smashing some businesses and growing others into giants Their stories are here in the news In short here are predictions for what won t and will happen in 2014 for the mobile technology industry breakdowns of marketshare figures on the horse race aspect of the business chapters on Apple Samsung Google Microsoft Nokia Blackberry Amazon Yahoo news about social media giants Facebook Twitter Google LinkedIn Foursquare SnapChat and the carriers themselves Verizon AT T Sprint and T Mobile You can also review my 2013 mobile predictions and see my track record on predictions Finally there are some essays on how all this mobile tech is figuring into our lives I ve divided the news into the subjects it covers but also put in the appendix all the news as it came out in chronological ordering You can read the firehose of events in the appendix or just read about one topic at a time in the earlier chapters Table of Contents Preface Introduction Chapter 1 2014 Predictions Chapter 2 Mobile Marketshare Chapter 3 Apple Chapter 4 Samsung Chapter 5 Google Chapter 6 Microsoft Chapter 7 Nokia Chapter 8 Blackberry Chapter 9 Amazon Chapter 10 Social Media Chapter 11 Yahoo Chapter 12 Carriers Chapter 13 2013 Predictions Chapter 14 Essays Appendix [ODROID Magazine](#) ,2016-09-01 Table of Contents 6 Hacking Pokemon Go With an ODROID How to Perform GPS Spoofing 10 Taking a Crack at Breaking WPA Networks Part 2 14 ODROID C1 Laptop A Custom Home Project Codenamed Redtop 17 Pac Man 256 A Classic Game A New Twist on the Endless Runner Genre Find Out 18 Installing Hadoop and Spark Onto an ODROID XU4 Cluster 22 Backup Scripts Keep Your Data Safe For Your Peace of Mind 27 ODROID C2 as an IoT Device Interfacing With The Real World 31 Kodibuntu Auto Starting Kodi With a Full Ubuntu Distribution 32 A Car Computer For The Love of Customization Chronicles of a Mad Scientist 35 Linux Gaming Sega Saturn and CDEmu 39 The XU4 Punnet A Printable Card Case for the ODROID XU4 41 Why Does the Loser Seem to Touch the Finish Line First Interesting Experiments to Understand the Difference of Shutter Mechanisms 42 ODROID VU7 Plus Your Favorite Touchscreen Now Offers Higher
