Morazán,Sven-Bodo Scholz,2010-10-31 This book constitutes the thoroughly refereed post proceedings of the 21st International Workshop on Implementation and Applications of Functional Languages IFL 2000 held in South Orange NJ USA in September 2009 The 13 revised full papers presented were carefully reviewed and were selected from numerous submissions The IFL symposia bring together researchers and practitioners that are actively engaged in the implementation and the use of functional and function based programming languages Every year IFL provides a venue for the presentation and discussion of new ideas and concepts of work in progress and of publication ripe results **Solitons and the Inverse Scattering Transform** Mark J. Ablowitz,Harvey Segur,2006-05-15 A study by two of the major contributors to the theory of the inverse scattering

transform and its application to problems of nonlinear dispersive waves that arise in fluid dynamics plasma physics nonlinear optics particle physics crystal lattice theory nonlinear circuit theory and other areas A soliton is a localised pulse like nonlinear wave that possesses remarkable stability properties Typically problems that admit soliton solutions are in the form of evolution equations that describe how some variable or set of variables evolve in time from a given state The equations may take a variety of forms for example PDEs differential difference equations partial difference equations and integrodifferential equations as well as coupled ODEs of finite order What is surprising is that although these problems are nonlinear the general solution that evolves from almost arbitrary initial data may be obtained without approximation

Logic Based Program Synthesis and Transformation M. Leuschel, 2003-06-18 This book constitutes the thoroughly refereed post proceedings of the 12th International Workshop on Logic Based Program Synthesis and Transformation LOPSTR 2002 held in Madrid Spain in September 2002 The 15 revised full papers presented together with 7 abstracts were carefully selected during two rounds of reviewing and revision from 40 submissions The papers are organized in topical sections on debugging and types tabling and constraints abstract interpretation program refinement verification partial evaluation and rewriting and object oriented development **Simple Models of Complex Nuclei** Igal Talmi, 2017-10-06 applications to the structure of atomic nuclei The author systematically develops these models from the elementary level through an introduction to tensor algebra to the use of group theory in spectroscopy The book s extensive and detailed appendix includes a large selection of useful formulae of tensor algebra and spectroscopy The serious graduate student as well as the professional physicist will find this complete treatment of the shell model to be an invaluable addition to the literature **Nominal Arguments and Language Variation** Li Julie Jiang, 2020-09-28 This book investigates nominal arguments in classifier languages refuting the long held claim that classifier languages do not have overt article determiners D Li Julie Jiang brings the typologically unique Nuosu Yi a classifier language that has an overt article D to the forefront of the theoretical investigation By comparing nominal arguments in Nuosu Yi to those in Mandarin a well studied classifier language that has no overt evidence of article determiners Jiang provides a new parametric account of variation among classifier languages and extends the account to argument formation in general **Scientific American** , 1896 **A Digest of the Reports of the United States** Benjamin Vaughan Abbott, 1889
