Online Choice Richard Harper:

Choice Richard Harper, Dave Randall, Wes Sharrock, 2017-09-05 We make decisions every day Yet we are sometimes perplexed by these decisions and the decisions of others To complicate things further we live in an age where there are more things to choose from than ever before the Internet is transforming our choices and making us more accountable for them what we choose is recorded modelled and used to predict our future behaviour So are we in a position to make better choices today than we were a decade ago Certainly there are some who believe so Psychologists claim we are subject to hidden mental processes that lead us to one thing rather than another economists offer predictions about what people will buy and some philosophers claim that our choices echo our evolutionary past Are these claims merited Do they reflect the beginnings of a new science of choice This book offers a critical overview of these and other claims showing where they are justified and where they are exaggerated It will be an essential reference for anyone interested in whether science can help us to understand both the ways people make choices in their everyday lives and how these may be changing

Nudging Choices Through Media James Katz, Katie Schiepers, Juliet Floyd, 2023-06-30 This book addresses the growing use of computerized systems to influence people's decisions without their awareness a significant but underappreciated sea change in the way the world works To assess these systems this volume's contributors explore the philosophical and ethical dimensions of algorithms that guide people's behavior by nudging them toward choices preferred by systems architects Particularly in an era of heightened awareness of bias and discrimination these systems raise profound concerns about the morality of such activities This volume brings together a diverse array of thinkers to critically examine these nudging systems Not only are high level perspectives presented but so too are of those who use them on a day to day basis While algorithmic nudging can produce benefits for users there are also many less obvious costs to using such systems costs that require examination and deliberation This book is a major step towards delineating these concerns and suggesting ways to provide a sounder basis for future policies for algorithms It should be of interest to system designers public policymakers scholars and those who wonder more deeply about the nudges they receive from various websites and on their phones

Digital Media, Youth, and Credibility Miriam J. Metzger, Andrew J. Flanagin, 2008 The difficulties in determining the quality of information on the Internet in particular the implications of wide access and questionable credibility for youth and learning Today we have access to an almost inconceivably vast amount of information from sources that are increasingly portable accessible and interactive The Internet and the explosion of digital media content have made more information available from more sources to more people than at any other time in human history This brings an infinite number of opportunities for learning social connection and entertainment But at the same time the origin of information its quality and its veracity are often difficult to assess This volume addresses the issue of credibility the objective and subjective components that make information believable in the contemporary media environment The contributors look particularly at youth audiences and experiences

considering the implications of wide access and the questionable credibility of information for youth and learning They discuss such topics as the credibility of health information online how to teach credibility assessment and public policy solutions Much research has been done on credibility and new media but little of it focuses on users younger than college students Digital Media Youth and Credibility fills this gap in the literature Contributors Matthew S Eastin Gunther Eysenbach Brian Hilligoss Frances Jacobson Harris R David Lankes Soo Young Rieh S Shyam Sundar Fred W Weingarten Das Ende der Informationskontrolle Thilo Hagendorff, 2017-02-15 Nutzerinnen und Nutzer digitaler Medien haben immer weniger Möglichkeiten der Daten und Informationskontrolle Hacker IT Unternehmen Geheimdienste Datenbroker Technikentwickler etc aber auch das aufkommende Internet der Dinge Big Data oder intransparente Algorithmen treiben den Kontrollverlust voran Vormals voneinander separierte Informationskontexte Intimes Privates öffentliches Institutionelles etc gehen allmählich ineinander über Hier setzt Thilo Hagendorff an Er stellt innovative Mediennutzungsstrategien vor die den Kontrollverlust erwarten oder sogar vielmehr fest mit ihm rechnen und sich nicht auf verletzliche Privatheitsnormen oder unzuverlässige Datenschutztechnologien verlassen **Manual of Romance Languages in the Media** Kristina Bedijs, Christiane Maaß, 2017-09-25 This manual provides an extensive overview of the importance and use of Romance languages in the media both in a diachronic and synchronic perspective Its chapters discuss language in television and the new media the language of advertising or special cases such as translation platforms or subtitling Separate chapters are dedicated to minority languages and smaller varieties such as Galician and Picard and to methodological approaches such as linguistic discourse analysis and writing process research Leonardo's Choice Carol Gigliotti, 2009-09-18 Leonardo's Choice Genetic Technologies and Animals is an edited collection of twelve essays and one dialogue focusing on the profound affect the use of animals in biotechnology is having on both humans and other species Communicating crucial understandings of the integrated nature of the human and non human world these essays unlike the majority of discussions of biotechnology take seriously the impact of these technologies on animals themselves This collection's central questions revolve around the disassociation Western ideas of creative freedom have from the impacts those ideas and practices have on the non human world This transdisciplinary collection includes perspectives from the disciplines of philosophy cultural theory art and literary theory history and theory of science environmental studies law landscape architecture history and geography Included authors span three continents and four countries Included essays contribute significantly to a growing scholarship surrounding the question of the animal emanating from philosophical cultural and activist discourses Its authors are at the forefront of the growing number of theorists and practitioners across the disciplines concerned with the impact of new technologies on the more than human world The Happiness Choice Marilyn Tam, 2013-02-14 Discover the path to a happy life from a woman who overcame the odds and achieved a joyful life Author Marilyn Tam takes what she learned from being an unwanted neglected and abused child in Hong Kong to become an international business success and humanitarian who is

Wi-Fi Julian Thomas,Rowan Wilken,Ellie Rennie,2021-06-15 From caf culture to home schooling remote community networks and smart cities Wi Fi is an invisible but fundamental element of contemporary life Loosely regulated low cost and largely overlooked by researchers this technology has driven the rise of the smartphone and broadband internet and is a vital element in the next wave of automation Thomas Wilken and Rennie provide the first comprehensive account of the social and cultural consequences of Wi Fi highlighting the ways in which it has changed our homes communities and cities They discuss its origins as an experimental technology the conflicts generated around its ownership and control and the ideas and expectations attached to it by technologists activists and entrepreneurs The authors reveal the ways in which Wi Fi is an inherently social and political technology animated by conflicting aspirations for local public and community control and defined by private and corporate interests As this book shows Wi Fi has extended and intensified our online lives while also promising a more inclusive internet Wi Fi is essential reading for students and scholars of media and communication as well as anyone who wants a better understanding of this

ubiquitous and influential technology **Choice** ,2005 *Theories of Choice* Stefan Grundmann,Philipp Hacker,2021-01-14

Choice is a key concept of our time It is a foundational mechanism for every legal order in societies that are politically constituted as democracies and economically built on the market mechanism Thus choice can be understood as an atomic structure that grounds core societal processes In recent years however the debate over the right way to theorize choice for example as a rational or a behavioral type of decision making has intensified This collection provides an in depth discussion of the promises and perils of specific types of theories of choice It shows how the selection of a specific theory of choice can make a difference for concrete legal questions in particular in the regulation of the digital economy or in choosing between market firm or network In its first part the volume provides an accessible overview of the current debates about rational versus behavioral approaches to theories of choice The remainder of the book structures the vast landscape of theories of choice along with three main types individual collective and organizational decision making As theories of choice proliferate and become ever more sophisticated however the process of choosing an adequate theory of choice becomes increasingly intricate This volume addresses this selection problem for the various legal arenas in which individual organizational and collective decisions matter By drawing on economic technological political and legal points of view the volume shows which theories of choice are at the disposal of the legally relevant decision maker and how they can be operationalized for the solution of concrete legal problems The editors acknowledge the kind support of the Fritz Thyssen Foundation for an exploratory conference on the subject of the book **AIDS at 30** Victoria A Harden,2012 Society was not prepared in 1981 for the appearance of a new infectious disease but we have since learned that emerging and reemerging diseases will continue to challenge humanity AIDS at 30 is the first history of HIV AIDS written for a general audience that emphasizes the medical response to the epidemic Award winning medical historian Victoria A Harden approaches the AIDS virus from philosophical and intellectual perspectives in the history of medical science discussing the process of scientific discovery scientific evidence and how laboratories found the cause of AIDS and developed therapeutic interventions Similarly her book places AIDS as the first infectious disease to be recognized simultaneously worldwide as a single phenomenon After years of believing that vaccines and antibiotics would keep deadly epidemics away researchers doctors patients and the public were forced to abandon the arrogant assumption that they had conquered infectious diseases By presenting an accessible discussion of the history of HIV AIDS and analyzing how aspects of society advanced or hindered the response to the disease AIDS at 30 illustrates for both medical professionals and general readers how medicine identifies and evaluates new infectious diseases quickly and what political and cultural factors limit the medical community s response *Presidential Decision Making and Military Intervention in the Post-Cold War Era* Dennis N. Ricci,2019-07-08 Despite the end of the Cold War the frequency of U S military intervention has increased While military intervention accelerated after 9 11 increasing intervention was demonstrably evident well before 2001 Presidential Decision Making and Military Intervention in the Post

Cold War Era Go or No Go analyzes presidential decision making regarding military intervention through a focused structured comparison of go and no go decisions from the four successive administrations of Presidents George H W Bush Bill Clinton George W Bush and Barack Obama Dennis Ricci explores competing explanations for why a presidential administration will decide to intervene in one situation and not in another Since both the situations and decision makers vary across cases Ricci analyzes explanations for intervention by asking Why intervene Why use force or not Under what conditions or circumstances are intervention decisions made
