Management Thomas S. Bateman, Scott Snell, 2004. Book Description: Management: The New Competitive Landscape by Bateman and Snell has consistently discussed and explained the traditional functional approach to management through planning, organizing, leading, and controlling. But the 6th edition goes a step further in defining and highlighting with icons four bottom-line practices that managers and companies must deliver to their customers: Innovation, Speed, Quality, and Cost. Bateman and Snell's Management: The New Competitive Landscape 6th edition has always been about a series of firsts: first to have a chapter on diversity, first to devote a section to the environment, and first to relate a bricks-and-clicks theme to explain the challenges of managing in a New Economy. This new edition is no exception with the expansion of such timely topics as ethics and technology. Management: The New Competitive Reality 6th edition shows how managers must utilize the classic principles of management in combination with the practices of the New Economy to

achieve managerial goals By reinforcing these new business practices in context with the functional approaches the authors deliver a unique theme amongst all principles of management texts how to manage in ways that deliver results **AJRCCM**,2008 *Annual Meeting Proceedings American Society of Clinical Oncology*.
