interdisciplinary contribution suitable for researchers and students across Digital Media Media and Communication and Gender and Cultural Studies **China's Environmental Challenges** Judith Shapiro, 2016-01-19 China's huge environmental challenges are significant for us all. They affect not only the health and well-being of China but the very future of the planet. In the second edition of this acclaimed trailblazing book, noted China specialist and environmentalist Judith Shapiro investigates China's struggle to achieve sustainable development against a backdrop of acute rural poverty and soaring middle-class consumption. Using five core analytical concepts to explore the complexities of this struggle, the implications of globalization, the challenges of governance, contested national identity, the evolution of civil society, and problems of environmental justice and displacement of environmental harm, Shapiro poses a number of pressing questions: Can the Chinese people equitably achieve the higher living standards enjoyed in the developed world? Are China's environmental problems so severe that they may shake the government's stability, legitimacy, and control? To what extent are China's environmental problems due to world-wide patterns of consumption? Does China's rise bode ill for the displacement of environmental harm to other parts of the world? And in a world of increasing limits on resources, how can we build a system in which people enjoy equal access to resources without taking them from successive generations, from the vulnerable, or from other species? China and the planet are at a pivotal moment: transformation to a more sustainable development model is still possible. But as Shapiro persuasively argues, doing so will require humility, creativity, and a rejection of business as usual. The window of opportunity will not be open much longer. **Minitel** Julien Mailland, Kevin Driscoll, 2017-06-23 The first scholarly book in English on Minitel, the pioneering French computer network, offers a history of a technical system and a cultural phenomenon. A decade before the Internet became a medium for the masses, in the United States tens of millions of users in France had access to a network for e-mail, e-commerce, chat, research, game playing, blogging, and even an early form of online porn. In 1983 the French government rolled out Minitel, a computer network that achieved widespread adoption in just a few years as the government distributed free terminals to every French telephone subscriber. With this volume, Julien Mailland and Kevin Driscoll offer the first scholarly book in English on Minitel, examining it as both a technical system and a cultural phenomenon. Mailland and Driscoll argue that Minitel was a technical marvel, a commercial success, and an ambitious social experiment. Other early networks may have introduced protocols and software standards that continue to be used today, but Minitel foretold the social effects of widespread telecomputing. They examine the unique balance of forces that enabled the growth of Minitel: public and private, open and closed, centralized and decentralized. Mailland and Driscoll describe Minitel's key technological components, novel online services, and thriving virtual communities. Despite the seemingly tight grip of the state, however, a lively Minitel culture emerged, characterized by spontaneity, imagination, and creativity. After three decades of continuous service, Minitel was shut down in 2012, but the history of Minitel should continue to inform our thinking about Internet policy today and into the future. **Communication Technology Update and Fundamentals** August E.

The Covid Consensus (Updated) Toby Green, Thomas Fazi, 2023-01-05 During the first years of the pandemic, the political mainstream agreed that following the science with hard lockdowns and vaccine mandates was the best way to preserve life. But social science reveals the true human cost of this policy. *The Covid Consensus* provides an internationalist left perspective on the world's Covid-19 response, which has had devastating consequences for democratic rights and the poor worldwide. As the fortunes of the richest soared, nationwide shutdowns devastated small businesses, the working classes, and the Global South's informal economies. Gender-based violence surged, and the mental health of young people was severely compromised. Meanwhile, unprecedented health restrictions prevented participation in daily life without proof of vaccination. Toby Green and Thomas Fazi argue that these policies grossly exacerbated existing trends of inequality, mediatisation, and surveillance with grave implications for the future. Rich in human detail, *The Covid Consensus* tackles head-on the refusal of the global political class and mainstream media to report the true extent of the erosion of democratic processes and the socioeconomic assault on the poor. As the world emerges from the pandemic to confront new modes of monitoring and control, this left-wing reappraisal of global Covid policies exposes the injustices and political failings that have produced the biggest crisis since the Second World War.

Das Kapital des Staates Mariana Mazzucato, 2023-02-08 Nach gängiger Meinung beruht man Innovationen am besten bei dynamischen privaten Unternehmen, und der Staat hält sich raus. Das Gegenteil ist der Fall, beweist die international renommierte Ökonomin Mariana Mazzucato in ihrem in 21 Ländern veröffentlichten bahnbrechenden Buch. Der Privatsektor findet erst dann den Mut einzusteigen, wenn der unternehmerisch denkende Staat die risikoreichen Investitionen getriggert hat. Unsere Unfähigkeit, die Rolle des Staates bei Innovation und Wachstum anzuerkennen, könnte sehr wohl die größte Bedrohung der Entwicklung von Wohlstand sein.
