comprehensive presentation of tools that can be used to systematically generate innovative ideas for new business growth opportunities. The reason for this is not least the knowledge that a missed wave of innovation can lead to major problems for the entire company. A central finding of business management research is that ideas for generating future growth opportunities are often not a product of chance but the results of systematic analyses. The authors provide a structured and comprehensive overview of the most important tools for identifying new growth opportunities. They distinguish between company related, market related and environment related approaches, incorporate numerous practical examples and provide application oriented assistance with these tools. The second edition of the book incorporates the latest research findings, some examples have been updated and supplemented and the book has been expanded to include practical application tasks for teaching and practical workshops.
