Apollo 11 James Donovan, 2019-05-13 Apollo 11 die unmögliche Mission In der Nacht vor seinem Flug zum Mond rechnete Neil Armstrong die Chancen aus die er Buzz Aldrin und Michael Collins hatten um lebend zur Erde zurückzukehren Fifty Fifty dachte er Andere Experten hingegen darunter auch Wissenschaftler und Techniker der NASA sahen die Sache weitaus weniger optimistisch 5 zu 1 sagten sie dass die Männer nicht zurückkommen Oder sogar 10 zu 1 Apollo 11 war die unmögliche Mission ihr Scheitern wahrscheinlicher als ihr Erfolg Praktisch zum Jahrestag erzählt der Journalist und Historiker James Donovan die Geschichte der Mondlandung in allen spannenden Details noch einmal neu und legt dabei auch viel Gewicht auf die menschliche Seite Entstanden ist ein mitreißendes und reich bebildertes Sachbuch *One Giant Leap* Charles Fishman, 2020-09-22 The New York Times bestselling meticulously researched and absorbingly written The Washington Post story of the trailblazers and the ordinary Americans on the front lines of the epic Apollo 11 moon mission President John F Kennedy astonished the world on May 25 1961 when he announced to Congress that the United States should land a man on the Moon by 1970 No group was more surprised than the scientists and engineers at NASA who suddenly had less than a decade to invent space travel When Kennedy announced that goal no one knew how to navigate to the Moon No one knew how to build a rocket big enough to reach the Moon or how to build a computer small enough and powerful enough to fly a spaceship there No one knew what the surface of the Moon was like or what astronauts could eat as they flew there On the day of Kennedy's historic speech America had a total of fifteen minutes of spaceflight experience with just five of those minutes outside the atmosphere Russian dogs had more time in space than US astronauts Over the next decade more than 400 000 scientists engineers and factory workers would send twenty four astronauts to the Moon Each hour of space flight would require one million hours of work back on Earth to get America to the Moon on July 20 1969 A veteran space reporter with a vibrant touch nearly every sentence has a fact an insight a colorful quote or part of a piquant anecdote The Wall Street Journal and in One Giant Leap Fishman has written the sweeping definitive behind the scenes account of the furious race to complete one of mankind's greatest achievements It's a story filled with surprises from the item the astronauts almost forgot to take with them the American flag to the extraordinary impact Apollo would have back on Earth and on the way we live today From the research labs of MIT where the eccentric and legendary pioneer Charles Draper created the tools to fly the Apollo spaceships to the factories where dozens of women sewed spacesuits parachutes and even computer hardware by hand Fishman captures the exceptional feats of these ordinary Americans It's been 50 years since Neil Armstrong took that one small step Fishman explains in dazzling form just how unbelievable it actually was Newsweek

The Apollo 11 Moon Landing Sylvia Engdahl, 2011-07-22 Since humankind first set eyes on the glowing orb in the night sky we have been fascinated by the moon This handy volume gives readers a background on the Apollo 11 Moon Landing through a variety of essays representing various perspectives Readers are then introduced to several controversies

surrounding the landing including whether it was a waste of effort enthusiasm or money From this enriched international understanding readers are then treated to first hand accounts which will transport their imagination back through time and allow them to form lasting intelligent opinions Essay sources include the Associated Press the London Times Margaret Mead Jean Jacques Dordain and NASA

Remembering the space age: Proceedings of the 50th Anniversary Conference , One Giant Leap Piers Bizony,2009-05-01 The first moon landing in July 1969 captured the imagination of the world as no subsequent space spectacular has Forty years later space historian Piers Bizony has produced a stunning visual record of this unparalleled mission Drawing on high resolution images from the entire suite of Apollo 11 s on board film magazines the book presents a complete picture of the mission the launch the astronauts lives inside the spacecraft the landing and moon walk and finally the return to earth to worldwide acclaim Accompanying these remarkable images many published here for the first time is Bizony s fascinating essay on the lasting cultural and emotional impact of the mission Quotes from astronauts scientists and literary commentators add an extra dimension to Bizony s account Apollo 11 may have happened a long time ago Bizony remarks but it casts an important shadow over today s generation Can we live up to it and learn from it or even repeat its achievements with new spacecraft However tempting it might be to assume that our advanced modern society could go back to the moon it is an unavoidable fact as this book makes clear that Apollo 11 was an event that may never be replayed One Giant Leap gives modern readers the information and perspective for thinking about Apollo 11 and space exploration in general in an entirely new way

A Scheme of Heaven Alexander Boxer,2020-01-14 An illuminating look at the surprising history and science of astrology civilization s first system of algorithms from Babylon to the present day Humans are pattern matching creatures and astrology is the universe s grandest pattern matching game In this refreshing work of history and analysis data scientist Alexander Boxer examines classical texts on astrology to expose its underlying scientific and mathematical framework Astrology he argues was the ancient world s most ambitious applied mathematics problem a monumental data analysis enterprise sustained by some of history s most brilliant minds from Ptolemy to al Kindi to Kepler Thousands of years ago astrologers became the first to stumble upon the powerful storytelling possibilities inherent in numerical data To correlate the configurations of the cosmos with our day to day lives astrologers relied upon a scheme of heaven or horoscope showing

the precise configuration of the planets at a particular instant in time as viewed from a particular place on Earth Although recognized as pseudoscience today horoscopes were once considered a cutting edge scientific tool Boxer teaches us how to read these esoteric charts and appreciate the complex astronomical calculations needed to generate them by diagramming how the heavens appeared at important moments in astrology s history from the assassination of Julius Caesar as viewed from Rome to the Apollo 11 lunar landing as seen from the surface of the Moon He then puts these horoscopes to the test using modern data sets and statistical science arguing that today s data scientists do work similar to astrologers of yore By looking back at the algorithms of ancient astrology he suggests we can better recognize the patterns that are timeless characteristics of our own pattern matching tendencies At once critical rigorous and far ranging *A Scheme of Heaven* recontextualizes astrology as a vast technological project spanning continents and centuries that foreshadowed our data driven world today
