Constitutional Change in the Contemporary Socialist World Ngoc Son Bui, 2020-07-24 After the collapse of the Soviet bloc there are only five socialist or communist countries left in the world China Cuba Laos North Korea and Vietnam which constitute about one quarter of the world's population Yet there is little scholarship on their constitutions These countries have seen varying socioeconomic changes in the decades since 1991 which have led in turn to constitutional changes This book will investigate from a comparative and interdisciplinary perspective how and why the constitutional systems in these five countries have changed in the last three decades The book then breaks the constitutional changes down

into four questions what are the substantive contents of constitutional change what are the functions what are the mechanisms and what are the driving forces These questions form a framework to process the changes the five countries have gone through such as making new constitutions amending current ones introducing more rights allowing citizens to engage in changes enacting legislation and defining the constitutional authority of the three state branches and their relationship with the Communist Party While all five countries have adapted their constitutional systems the degree mechanisms and influential factors are not identical and present considerable variations This book examines and explores these differences and how they developed Constitutional Change in the Contemporary Socialist World offers a comprehensive and holistic view of an understudied and overlooked area of constitutional law essential for anyone studying or working in law politics or policy

What Twenty-first Century Leadership Can Learn from Nineteenth Century American Literature Christine A. Eastman, 2024-05-03 What Twenty First Leadership Can Learn from Nineteenth Century American Literature aims to narrow the gap between leadership theory and practice offering an account of how leaders in organizations can improve their practice by drawing on the literary imagination Eastman analyses how business students can use literary fiction to find solutions to workplace problems how they can engage with fictional writers ideas about work morality and the self and how they can articulate their own ideas about fostering a deeper connection between leaders and their teams in the workplace The book contributes to leadership studies by setting out the case for using literary fictional texts to explore leadership scenarios It has several purposes The first is to provide educators with ideas on how to use fiction with students following a business curriculum The second is to encourage industry to help their employees to become better able to analyse and synthesize complex and possibly conflicting ideas as well as how to articulate these ideas with clarity A third purpose is to demonstrate how university and industry can work together The work presents an alternative orientation for leaders predicated on the conviction that reading fiction will support students in becoming better at thinking about working relationships and at understanding other people and it provides the underpinnings of a unifying theoretical framework for learning through fiction in a professional context and aims to demonstrate that reading about how fictional characters respond to the challenges of life supports students to formulate their own innovative leadership thinking
