Money in One Lesson Gavin Jackson, 2022-01-20 Superb Tim Harford author of How to Make the World Add Up Money is essential to the economy and how we live our lives yet is inherently worthless We can use it to build a home or send us to space and it can lead to the rise and fall of empires Few innovations have had such a huge impact on the development of humanity but money is a shared fiction a story we believe in so long as others act as if it is true Money is rarely out of the headlines from the invention of cryptocurrencies to the problem of high inflation extraordinary interventions by central banks and the power the West has over the worldwide banking system In Money in One Lesson Gavin Jackson answers the most important questions on what money is and how it shapes our world drawing on vivid examples from throughout history to demystify and show how societies and its citizens both past and present are always entwined with matters of money A highly illuminating well researched and beautifully written book on one of humanity's most important innovations Martin Wolf chief economics commentator Financial Times

Bowker's Law Books and Serials in Print, 2000 **Arbitrability** Fabien Gélinas, Leyla Bahmany, 2023-11-17. As simple as the arbitrability question might appear, namely what types of issues may and may not be submitted to arbitration for a legal system to set a clear and consistent approach to arbitration, it must consider many complicated factors that relate to public policy and economic priorities as well as international relations. This comprehensive, precise and practical book identifies and analyzes the fundamentals of and major approaches to arbitrability in the current international context. The authors focus on nine major arbitration jurisdictions: the United States, Canada, France, England and Wales, Switzerland, Germany, China, Mainland Hong Kong and Singapore, with meticulous attention to each jurisdiction's pertinent case law and legislative framework as well as relevant commentary. For each jurisdiction, the arbitrability of disputes in the following fields of law is discussed: antitrust, competition, bankruptcy, insolvency, consumer, corporate, family, domestic relations, intellectual property, copyright, patent and trademark, labor, employment, securities and torts. Based on the jurisdiction-by-jurisdiction analysis, the authors identify key areas in which the selected jurisdictions share similarities and evince differences with respect to each of the above-mentioned fields. With a structure that enables readers to easily locate what they are looking for and gives clear-cut answers, this unique book fully elucidates the notion of arbitrability by identifying the key concepts, the applicable rules and different criteria for arbitrability and by explaining how different jurisdictions deal with specific types of disputes. It will be welcomed by counsel, arbitrators, judges, students and academics active in international arbitration and the enforcement of arbitral awards.
