Intergenerational Democracy, Environmental Justice and the Case of Nuclear Waste Lee Towers, Matthew Cotton, 2024-10-07 This book explores the interplay between intergenerational justice and intragenerational justice using nuclear waste management as a consistent case to explore these themes Lee Towers and Matthew Cotton examine the issue of intergenerational justice from a social scientific perspective drawing on central case studies of nuclear waste management in Canada Finland and the United Kingdom They connect indigenous philosophies and notions of justice

with the concept of intergenerational democracy advocating for better inclusion of youth and elders in decision making that affects their well being As such the book s primary objectives are fourfold To assess whether trade offs between intergenerational and intragenerational justice are necessary and if so what these trade offs are and how they might be resolved To critically assess dominant western liberal philosophical approaches that shape contemporary intergenerational justice thinking in policy and practice and consider alternatives drawn from anthropology and indigenous philosophies To assess how far our current capitalist system can achieve substantive forms of justice To critically examine three nuclear waste management case studies and assess how far these achieve environmental and energy justice and how they exemplify tensions between inter and intragenerational justice This short accessible volume will be of great interest to students and scholars of energy environmental justice and ethics Science and Citizens Melissa Leach,Ian Scoones,Brian Wynne,2013-04-04 Rapid advances and new technologies in the life sciences such as biotechnologies in health agricultural and environmental arenas pose a range of pressing challenges to questions of citizenship This volume brings together for the first time authors from diverse experiences and analytical traditions encouraging a conversation between science and technology and development studies around issues of science citizenship and globalisation It reflects on the nature of expertise the framing of knowledge processes of public engagement and issues of rights justice and democracy A wide variety of pressing issues is explored such as medical genetics agricultural biotechnology occupational health and HIV AIDS Drawing upon rich case studies from Asia Africa Latin America and Europe Science and Citizens asks Do new perspectives on science expertise and citizenship emerge from comparing cases across different issues and settings What difference does globalisation make What does this tell us about approaches to risk regulation and public participation How might the notion of cognitive justice help to further debate and practice **Paperbound Books in Print** ,1991 Social Research Methods Alan Bryman,2016 Adopting a coherent and student friendly format this book offers an encyclopaedic introduction to social research methodology and considers a broad range of qualitative and quantitative methods to help students identify and evaluate the best approach for their research needs Books in Print Supplement ,2002 **Forthcoming Books** Rose Army,2003 **The British National Bibliography** Arthur James Wells,2004 *Scientific and Technical Books and Serials in Print* ,1989 *Radioactive Waste* Frans Berkhout,1991 *Radioactive Waste* provides a detailed historical account of the policy and practice of radwaste management in Britain Sweden and the Federal Republic of Germany In their differing approaches these three countries define the parameters of civil nuclear strategy in Europe The comparative analysis of the evolution of policy clarifies the context of political and technical decision making Assessing the varying degrees of influence which the public the industry and the government exercise over these actions Frans Berkhout applies the concept of boundaries of control questioning the extent to which such control can be relinquished This analysis of nuclear strategy the politics of nuclear power and the shifting emphasis of government regulation redefines the issue of radwaste management

and sets it at the centre of the current debate about power the environment and society **Nuclear Waste Politics**

Matthew Cotton,2017-07-14 The question of what to do with radioactive waste has dogged political administrations of nuclear powered electricity producing nations since the inception of the technology in the 1950s As the issue rises to the forefront of current energy and environmental policy debates a critical policy analysis of radioactive waste management in the UK provides important insights for the future Nuclear Waste Politics sets out a detailed historical and social scientific analysis of radioactive waste management and disposal in the UK from the 1950s up to the present day drawing international comparisons with Sweden Finland Canada and the US A theoretical framework is presented for analysing nuclear politics blending literatures on technology policy environmental ethics and the geography and politics of scale The book proffers a new theory of ethical incrementalism and practical policy suggestions to facilitate a fair and efficient siting process for radioactive waste management facilities The book argues that a move away from centralised high capital investment national siting towards a regional approach using deep borehole disposal could resolve many of the problems that the high stakes inflexible megaproject approach has caused across the world This book is an important resource for academics and researchers in the areas of environmental management energy policy and science and technology studies The Politics of Radioactive Waste Management

Gianluca Ferraro,2018-11-01 Environmental concerns have pushed the decarbonisation of the European economy high on the EU political agenda This has renewed old debates about the role of nuclear energy in the European economy and society that gravitate around the issues of nuclear safety and radioactive waste management RWM RWM carries many elements of technical complexity scientific uncertainty and social value which makes policy decisions highly controversial Public participation is usually believed to improve these decisions ease their implementation by solving substantial conflicts and enhance trust and social acceptance Drawing upon sources including Euratom and the OECD Nuclear Energy Agency the author offers a detailed overview of public involvement in RWM in the EU analysing the implementation of national policies through official programmes and the views of stakeholders from all Member States This book highlights the key successes and challenges in the quest for greater participation in RWM and extrapolates insights for other contested energy infrastructures and controversies in land use This book will be of great relevance to students scholars and practitioners with an interest in radioactive waste management energy policy and EU environmental politics and policy

Stepwise Approach to Decision Making for Long-term Radioactive Waste Management ,2004 *German Radioactive Waste* Robert Rybski,2022-01-14 This book presents the universal issues of radioactive waste management from the perspective of the German legal system analysing how lawmakers have responded to the issue of nuclear waste It will be of interest to energy policy experts academics and professionals who work in the area of nuclear energy Radioactive Waste Management Pius Krütli,2010 Decision Making for Complex Socio-Technical Systems Thomas Flüeler,2006-03-08 Waste management can be considered as a mirror of society In its our fluctuating definition besides conserving a supply of valuable

materials and resources it acts as a fascinating expression for our throw away mentality Waste is inevitable but it nevertheless provides an opportunity a need and an incentive for society to pursue a more careful management of it If this is successfully carried out society may well find it possible to manage itself in an overall more careful and universal way The management or governance of radioactive waste particularly is determined by a complex constellation of individuals social aggregates and institutions A wealth of interconnected parts forms a complex and volatile system that is highly technical and explosively political in nature The problems inherent in this system must be managed so as to reach a safe acceptable responsible feasible and sustainable solution It is a system with an objective long term dimension with a hazard potential of in part hundreds of thousands of years and it has a long term institutional dimension insofar as its implementation must last for decades The very notion of risk extends from the long life of radionuclides over the perception of dread to the decisional risk of whether when and how to implement an agreed upon solution **Radioactive Waste** Rehab O. Abdel

Rahman,2012-04-25 The safe management of nuclear and radioactive wastes is a subject that has recently received considerable recognition due to the huge volume of accumulative wastes and the increased public awareness of the hazards of these wastes This book aims to cover the practice and research efforts that are currently conducted to deal with the technical difficulties in different radioactive waste management activities and to introduce to the non technical factors that can affect the management practice The collective contribution of esteemed international experts has covered the science and technology of different management activities The authors have introduced to the management system illustrate how old management practices and radioactive accident can affect the environment and summarize the knowledge gained from current management practice and results of research efforts for using some innovative technologies in both pre disposal and disposal activities *Alternatives, Tiered Environmental Assessment and Decision-making in Radioactive Waste*

Management Cassie Wesolowski,2008 Not Here, Not There, Not Anywhere Daniel J. Sherman,2011 First Published in 2011 Routledge is an imprint of Taylor Francis an informa company
