Online Book Drones Chris Lewis:

Drones and Targeted Killing in the Middle East and Africa, Christine Sixta Rinehart, 2016-12-06 The United States has repeatedly used drones to kill terrorists in Afghanistan Iraq Libya Pakistan Somalia Syria and Yemen in an effort to decrease terrorism and the vitality of terrorist groups Targeted killing through the use of drones has become a foreign policy weapon to keep the United States safe from further terrorist attacks However it is suspected that these killings has actually led to an increase in terrorist group recruitment terrorist attacks and empathy for the terrorist group from the local population in addition to several other unwanted repercussions The two part research question this book attempts to answer is What is the effect of drone targeted killing on Afghanistan Iraq Libya Pakistan Somalia Syria and Yemen And is it a successful method in the War on Terror

Drones and Global Order Paul Lushenko, Srinjoy Bose, William Maley, 2021-12-28 This book explores the implications of drone warfare for the legitimacy of global order The literature on drone warfare has evolved from studying the proliferation of drones to measuring their effectiveness to exploring their legal moral and ethical impacts These three waves of scholarship do not however address the implications of drone warfare for global order This book fills the gap by contributing to a fourth wave of literature concerned with the trade offs imposed by drone warfare for global order The book draws on the English School of International Relations Theory which is premised on the existence of a society of states bounded by common norms values and institutions to argue that drone warfare imposes contradictions on the structural and normative pillars of global order These consist of the structure of international society and diffusion of military capabilities as well as the sovereign equality of states and laws of armed conflict The book presents a typology of contradictions imposed by drone warfare within and across these axes that threaten the legitimacy of global order This framework also suggests a confounding consequence of drone warfare that scholars have not hitherto explored rigorously drone warfare can sometimes strengthen global order The volume concludes by proposing a research agenda to reconcile the complex and often counter intuitive impacts of drone warfare for global order This book will be of considerable interest to students of security studies global governance and International Relations

Drone Warfare The New York Times Editorial Staff, 2019-07-15 Military drones have revolutionized warfare in the 21st century Unmanned aerial vehicles or U A V s allow the Air Force to monitor and neutralize targets remotely keeping pilots and comrades in enemy territory safer in the process Central to the U S counterterrorism campaign since the terrorist attacks of 9 11 models such as the Predator and Global Hawk have been used in Libya Pakistan Somalia and Yemen among other areas in the Middle East and Africa purported to have terrorist activity This cool book follows the development of U S drone policy documenting the effects on U S forces foreign relations and the legal and ethical concerns of covert remote airstrikes Media literacy questions and terms challenge readers to further analyze the reporting styles and devices used to cover this uniquely modern issue

Algorithms of Armageddon George Galdorisi, Sam J Tangredi, 2024-03-12 It is unclear if U S policy makers and military

leaders fully realize that we have already been thrust into an artificial intelligence AI race with authoritarian powers Today the United States peer adversaries China and Russia have made clear their intentions to make major investments in AI and insert this technology into their military systems sensors and weapons Their goal is to gain an asymmetric advantage over the U S military The implications for our national security are many and complex Algorithms of Armageddon examines this most pressing security issue in a clear insightful delivery by two experts Authors George Galdorisi and Sam J Tangredi are national security professionals who deal with AI on a day to day basis in their work in both the technical and policy arenas Opening chapters explain the fundamentals of what constitutes big data machine learning and artificial intelligence They investigate the convergence of AI with other technologies and how these systems will interact with humans Critical to the issue is the manner by which AI is being developed and utilized by Russia and China The central chapters of the work address the weaponizing of AI through interaction with other technologies man machine teaming and autonomous weapons systems The authors cover in depth debates surrounding the AI genie out of the bottle controversy AI arms races and the resulting impact on policy and the laws of war Given that global powers are leading large scale development of AI it is likely that use of this technology will be global in extent Will AI enabled military weapons systems lead to full scale global war Can such a conflict be avoided The later chapters of the work explore these questions point to the possibility of humans failing to control military AI applications and conclude that the dangers for the United States are real Neither a protest against AI nor a speculative work on how AI could replace humans Algorithms of Armageddon provides a time critical understanding of why AI is being implemented through state weaponization the realities for the global power balance and more importantly U S national security Galdorisi and Tangredi propose a national dialogue that focuses on the need for U S military to have access to the latest AI enabled technology in order to provide security and prosperity to the American people

Terrorism and the US Drone Attacks

in Pakistan Imdad Ullah, 2021-03-30 This book analyses the US drone attacks against terrorists in Pakistan to assess whether the pre-emptive use of combat drones to kill terrorists is ever legally justified Exploring the doctrinal discourse of pre-emption vis-à-vis the US drone attacks against terrorists in Pakistan the book shows that the debate surrounding this discourse encapsulates crucial tensions between the permission and limits of the right of self-defence Drawing from the long history of God-given and man-made laws of war this book employs positivism as a legal frame to explore and explain the doctrine of pre-emption and analyses the doctrine of the state's rights to self-defence as it stretches into pre-emptive or preventive use of force The book investigates why the US chose the recourse to pre-emption through the use of combat drones in the war on terror and whether there is a potential future for the pre-emption of terrorism through combat drones The author argues that the policy to kill first is easy to adopt however any disregard for the web of legal requirements surrounding the policy has the potential to undercut the legal claims of an armed act The book enables the framing and analysis of such controversies in legal terms as opposed to a choice between law and policy An examination of the legal dilemma concerning drone warfare this book will be of interest to academics in the field International Relations Asian Politics South Asian Studies and Security Studies in particular global security law new wars and emerging technologies of warfare

Making Things International 2 Mark B. Salter, 2016-04-10 Drawing widely from contemporary social and critical thought Making Things International 2 offers provocative interventions into debates about causality connection and politics through the notion of assemblage Political assemblages especially those that cross national borders can be catalyzed by a host of surprising sparks Present-day global systems are complex and interdependent but the worn tools of traditional international relations theory are unsuited to the task of understanding how objects ideas and people come together to create dispute solve or perhaps cause these political configurations Contributors to this volume bring to their work a new sensitivity toward issues of power authority control and sovereignty The companion volume Making Things International 1 Circuits and Motion used things stuff and objects in motion to capture the material dynamics of global politics and to demonstrate the importance of the material This volume builds on that conversation by examining objects that incite political assemblages Specific subjects include fighter jets smartphones tents HTTP cookies representations of North Korea and histories of the diplomatic cable the orange prison jumpsuit and container shipping Contributors Rune Saugmann Andersen U of Helsinki Josef Teboho Ansoorge Claudia Aradau King's College London Helen Arfvidsson Alexander D Barder Florida International U Tarak Barkawi London School of Economics Peter Chambers Shine Choi Seoul National U Sagi Cohen Thomas N Cooke Anna Feigenbaum Bournemouth U Andreas Folkers Goethe U Frankfurt Fabian Frenzel U of Leicester Kyle Grayson Newcastle U Nicky Gregson Durham U David Grondin U of Ottawa Xavier Guillaume U of Edinburgh Emily Lindsay Jackson Acadia U Miguel de Larrinaga U of Ottawa Debbie Lisle Queen's U Belfast Mary Manjikian Regent U Nadine Marquardt Goethe U Frankfurt Patrick McCurdy U of Ottawa Adam Sandor Nisha Shah U of Ottawa Julian Stenmanns Goethe U Frankfurt Casper
