Inzunza-Gonzalez, Enrique Efren Garcia-Guerrero, Esteban Tlelo-Cuautle, 2024-02-21 This book highlights applications that include machine learning methods to enhance new developments in complex and unmanned systems The contents are organized from the applications requiring few methods to the ones combining different methods and discussing their development and hardware software implementation The book includes two parts the first one collects machine learning applications in complex systems mainly discussing developments highlighting their modeling and simulation and hardware implementation The second part collects applications of machine learning in unmanned systems including optimization and case studies in submarines drones and robots The chapters discuss miscellaneous applications required by both complex and unmanned systems in the areas of artificial intelligence cryptography embedded hardware electronics the Internet of Things and healthcare Each chapter provides guidelines and details of different methods that can be reproduced in hardware software and discusses future research Features Provides details of applications using machine learning methods to solve real problems in engineering Discusses new developments in the areas of complex and unmanned systems Includes details of hardware software implementation of machine learning methods Includes examples of applications of different machine learning methods for future lines for research in the hot topic areas of submarines drones robots cryptography electronics healthcare and the Internet of Things This book can be used by graduate students industrial and academic professionals to examine real case studies in applying machine learning in the areas of modeling simulation and optimization of complex systems cryptography electronics healthcare control systems Internet of Things security and unmanned systems such as submarines drones and robots

Proceedings of the 4th International Conference on Language, Art and Cultural Exchange (ICLACE 2023) Bootheina Majoul, Guiyun Guan, Nick Groom, 2023-08-28 This is an open access book The 4th International Conference on Language Art and Cultural Exchange ICLACE 2023 will be held on May 19 21 2023 in Hangzhou China Culture includes language which is a special cultural phenomenon For culture most scholars agree that it mainly includes two aspects material culture and spiritual culture Specific examples to show cultural phenomena will be of great benefit to our understanding Some examples of material culture are listed here Indian women wear saris Japanese like to eat sashimi and Chinese like to shake hands when meeting each other These are various manifestations of material culture in different nations Language is the mode of transmission of culture Language is one of the most important ways of thinking and cultural exchange of human beings which is actually the manifestation of the formation and transmission of culture Because of thinking human beings gradually create culture in the continuous social practice and then spread their national culture to each other in the continuous language exchange Since ancient times art and culture have been going hand in hand

and complementing each other On the one hand art is an important connotation and component of culture and the progress of art is the driving force of cultural development On the other hand culture is the source and content of art and the prosperity of culture is the key to improve the level of art On the other hand culture is the source and content of art and the prosperity of culture is the key to improving the level of art Therefore whether it is culture or art it is not only a symbol of an era a representation of people s life style but also a guide to the direction of social development The relationship between language art and cultural communication is a hot topic for many scholars to study at present Therefore an academic conference is set up for authors to discuss related research issues and exchange new ideas hoping that scholars can burst out more excellent and valuable ideas in this conference ICLACE 2023 is to bring together innovative academics and industrial experts in the field of Literature Art and Cultural Exchange research to a common forum The primary goal of the conference is to provide a platform for scientists scholars and engineers from all over the world to present ongoing research activities fostering the research and business relations and promoting scientific information interchange and cooperation between all the participants

Humans and Generative AI Tools for Collaborative Intelligence Zhao, Jingyuan,Kumar, V. Vinoth,Katina, Polinpapilinho F.,Richards, Joseph,2025-06-11 The relationship between humans and generative AI tools creates a new era of collaborative intelligence where human creativity critical thinking and empathy merge with the speed scale and precision of artificial intelligence Rather than replacing human roles generative AI systems help with problem solving ideation and decision making across diverse fields such as education healthcare design and business This enables individuals and organizations to reveal deeper insights accelerate innovation and tackle complex challenges with enhanced efficiency As these technologies advance the focus is shifting toward fostering ethical inclusive and human centered collaborations that amplify collective intelligence rather than diminish it *Humans and Generative AI Tools for Collaborative Intelligence* explores recent advancements in collaborative intelligence of humans and generative AI tools with a focus on state of the art approaches methodologies and systems for the design development deployment and innovative use of those technologies and applications to advance industries and organizations It develops guidelines to help industries and organizations achieve the collaborative intelligence of humans and generative AI tools and put the power of collaborative intelligence to work This book covers topics such as digital technology robotics and deep learning models and is a useful resource for business owners computer engineers academicians researchers and data scientists

Generative AI in Software Engineering Aguilar-Calderón, José Alfonso,2025-06-13 Generative AI transforms the landscape of software engineering enabling automation creativity and efficiency throughout development By leveraging advanced machine learning models like large language models and code generation tools developers can automate code generation streamline testing and design software architectures This shift accelerates development timelines and redefines the roles of engineers and the skills required in modern software teams As generative AI evolves its integration into software engineering raises important

questions around reliability security and human AI collaboration Generative AI in Software Engineering explores the evolving role of generative AI in the software engineering landscape It examines how AI accelerates software development reduces costs and enhances creativity offering real world benefits for businesses This book covers topics such as quantum computing visual intelligence and environment science and is a useful resource for business owners computer engineers academicians researchers and data scientists

Classification in BioApps Nilanjan Dey,Amira S. Ashour,Surekha Borra,2017-11-10 This book on classification in biomedical image applications presents original and valuable research work on advances in this field which covers the taxonomy of both supervised and unsupervised models standards algorithms applications and challenges Further the book highlights recent scientific research on artificial neural networks in biomedical applications addressing the fundamentals of artificial neural networks support vector machines and other advanced classifiers as well as their design and optimization In addition to exploring recent endeavours in the multidisciplinary domain of sensors the book introduces readers to basic definitions and features signal filters and processing biomedical sensors and automation of biomeasurement systems The target audience includes researchers and students at engineering and medical schools researchers and engineers in the biomedical industry medical doctors and healthcare professionals

A Comprehensive Guide to Earning Money with AI for Beginners Luke Thompson,2025-07-02 AI Powered Income A Comprehensive Guide to Earning Money with AI for Beginners Step into the future of earning with AI Powered Income your essential guide to turning the power of artificial intelligence into real practical income streams Perfect for beginners and side hustlers this book breaks down exactly how people are using popular AI tools like ChatGPT Midjourney Canva and others to launch freelance services create and sell content start e commerce stores automate YouTube channels and even trade smarter in the stock and crypto markets Whether you want to write blogs faster generate stunning art build faceless video channels or automate customer service with AI chatbots this guide shows you how With simple step by step instructions recommended tools and real world success stories you ll learn how to Build an AI assisted freelancing business Create and monetize AI generated content Design and sell digital art with zero graphic design skills Launch automated YouTube channels without being on camera Boost your trading and e commerce results using AI tools Set up passive income streams powered by automation No tech background No problem This book was written with you in mind clear accessible and focused on action If you re ready to harness AI not just as a tool but as a pathway to freedom flexibility and financial growth AI Powered Income is your blueprint
