Global Economic Prospects 2008 Technology Diffusion in the Developing World examines the state of technology in developing countries and the pace with which it has advanced since the early 1990s It reveals both encouraging and cautionary trends On the one hand the pace of technological progress in developing countries has been much faster than in high income countries reflecting increased exposure to foreign technology as a result of linkages with high skilled diasporas and the opening of these countries to international trade and foreign direct investment On the other hand the technology gap remains large and the domestic factors that determine how quickly technologies spread within developing countries often stymie progress especially among low income countries This year s Global Economic Prospects comes on the heels of an extended period of strong growth and a 15 year period of strong performance in much of the developing world which has contributed to substantial declines in global poverty While high oil prices and heightened market volatility may signal a coming pause in this process over the longer term continued technological progress should continue to push back poverty Rapid technological progress in developing countries has been central to the reduction of poverty in recent decades While the integration of global markets has played and will continue to play a key role in this future success will increasingly depend on strengthening technical competencies and the business environment for innovative firms in developing countries Graeme Wheeler Managing Director The World Bank Higher Education, Globalization and Eduscapes Per-Anders Forstorp,Ulf Mellström,2018-04-25 This book examines transnational scapes and flows of higher education arguing that the educational and political vision of a national regional and global knowledge society needs to be perspectivized beyond its ethnocentric conditions and meanings Using eduscapes as its most important concept this book explores the educational landscapes of individual as well as institutional actors particularly the agential aspects of how global eduscapes are imagined experienced negotiated and constructed In addition the authors highlight the critical potential of anthropology using this perspective as a resource for cultural critique where the Western experience and assumed ownership of the global knowledge economy will be put into question This comprehensive book will appeal to students and scholars of educational policy the sociology of education and the globalization of education **PISA Education in the Eastern Partnership:**
