Migration Development And Transnationalization Critical Interventions:

Migration, Development, and Transnationalization Nina Glick Schiller, Thomas Faist, 2010-11-01 The relationship between migration and development is becoming an important field of study yet the fundamentals analytical tools conceptual framework political stance are not being called into question or dialogue This volume provides a valuable alternative perspective to the current literature as the contributors explore the contradictory discourses about migration and the role these discourses play in perpetuating inequality and a global regime of militarized surveillance The assumptions surrounding the asymmetrical transfers of resources that accompany migration are deeply skewed and continue to reflect the interests of the most powerful states and the institutions that serve their interests Those who seek to address the morass of development failure vitriolic attacks on immigrants or sanguine views about migrant agency are challenged by this volume to put aside their methodological nationalism and pursue alternative pathways out of the quagmire of poverty violence and fear that is enveloping the globe

Coworking Spaces Agnes Katharina Müller, 2018 Am Beispiel von Berliner Coworking Spaces untersucht Agnes Müller die Raumwirksamkeit einer mobilen und flexiblen Arbeitsgesellschaft Die Zusammenhänge des besonderen Bürokonzeptes mit einer sich ändernden Arbeitswelt dem städtischen Raum und seinen kreativen Milieus sowie Migration und Multilokalität erläutert sie auf drei Maßstabsebenen Hierin zeigt sich dass es sich bei diesen Büros um ein globales heterogenes und schnelllebiges Phänomen handelt Während sich die Büros zunehmend spezialisieren oder auch professionalisieren nehmen sie Einfluss auf das Stadtleben und die Stadtentwicklung

Remittances as Social Practices and Agents of Change Silke Meyer, Claudius Ströhle, 2023-08-31 This open access book explores the transformative effects of remittances Remittances are conceptualized as flows of money objects ideas traditions and symbolic capital mapping out a cross border space in which people live work and communicate with multiple belongings By doing so they effect social change both in places of origin and destination However their power to improve individual living conditions and community infrastructure mainly results from global inequality Hence we challenge the remittance mantra and go beyond the migration development nexus by revealing dependencies and frictions in remittance relations Remittances are thus scrutinized in their effects on both social cohesion and social rupture By highlighting the transformative effects of remittance in the context of conflict climate change and the postcolonial we shed light on the future of transnational society Presenting empirical case studies from Ghana Burkina Faso Sri Lanka New Zealand Turkey Lebanon USA Japan and various European countries as well as historical North America and the Habsburg Empire we explore remittance relations from a range of disciplines including anthropology sociology history design architecture governance and peace studies

Security and Development John-Andrew McNeish,Jon Harald Sande Lie,2010-11-01 Since 9 11 ideas of security have focused in part on the development of ungovernable spaces Important debates are now being had over the nature impacts and outcomes of the numerous policy statements made by northern governments NGOs and international institutions that view the merging of security with development as both unproblematic and progressive This volume addresses this new security development nexus and investigates internal institutional logics as well as the operation of policy its dangers resistances and complicity with other local and national social processes Drawing on detailed ethnography the contributors offer new vantage points to understand the workings of multiple intersecting and conflicting power structures which whilst local are tied to non local systems and operate across time This volume is a necessary critique and extension of key themes integral to the security development nexus debate highlighting the importance of a situated and substantive understanding of human security

Who's Cashing In? Atreyee Sen,Johan Lindquist,Marie Kolling,2020-08-01 Cashless infrastructures are rapidly increasing as credit cards cryptocurrencies online and mobile money remittances demonetization

and digitalization process replace coins and currencies around the world Who's Cashing In explores how different modes of cashlessness impact transform and challenge the everyday lives and livelihoods of local communities Drawing from a wide range of ethnographic studies this volume offers a concise look at how social actors and intermediaries respond to this change in the materiality of money throughout multiple regional contexts *Democracy's Paradox* Bruce Kapferer, Dimitrios Theodossopoulos, 2019-04-02 Does populism indicate a radical crisis in Western democratic political systems Is it a revolt by those who feel they have too little voice in the affairs of state or are otherwise marginalized or oppressed Or are populist movements part of the democratic process Bringing together different anthropological experiences of current populist movements this volume makes a timely contribution to these questions Contrary to more conventional interpretations of populism as crisis the authors instead recognize populism as integral to Western democratic systems In doing so the volume provides an important critique that exposes the exclusionary essentialisms spread by populist rhetoric while also directing attention to local views of political accountability and historical consciousness that are key to understanding this paradox of democracy **Becoming a Migrant Worker in Nepal** Hannah Uprety, 2022-09-01 High profile events such as the 2022 FIFA World Cup in Qatar have made one thing abundantly clear Much of today's economic growth would be unthinkable without the low wage employment of migrant workers But which cultural economic and political infrastructures in the source countries make these types of migration possible in the first place Based on multi sensory ethnographic research in Nepal Hannah Uprety retraces the practices of recruitment and instruction that step by step transform Nepali labor into an internationally marketable commodity In doing so she uncovers a migration regime that effectively turns local men and women into migrant workers before they even leave the country *The Global Life of Austerity* Theodoros Rakopoulos, 2018-06-18 Austerity and structural adjustment programs are just the latest forms of neoliberal policy to have a profoundly damaging impact on the targeted populations Yet as the contributors to this collection argue the recent austerity related European crisis is not a breach of erstwhile development schemes but a continuation of economic policies Using historical analysis and ethnographically grounded research this volume shows the similarities of the European conundrum with realities outside Europe seeing austerity in a non Eurocentric fashion In doing so it offers novel insights as to how economic crises are experienced at a global level *Routledge Handbook of Immigration and Refugee Studies* Anna Triandafyllidou, 2015-10-05 The Routledge Handbook of Immigration and Refugee Studies offers a comprehensive and unique study of the multi disciplinary field of international migration and asylum studies Utilising contemporary information and analysis this innovative Handbook provides an in depth examination of legal migration management in the labour market and its affect upon families in relation to wider issues of migrant integration and citizenship With a comprehensive collection of essays written by leading contributors from a broad range of disciplines including sociology of migration human geography legal studies political sciences and economics the Handbook is a truly multi disciplinary book approaching the critical

questions of Migration and the labour market Integration and citizenship Migration families and welfare Irregular migration smuggling and trafficking in human beings asylum and forced migration Organised into short thematic and geographical chapters the Routledge Handbook of Immigration and Refugee Studies provides a concise overview on the different topics and world regions as well as useful guidance for both the starting and the more experienced reader The Handbook s expansive content and illustrative style will appeal to both students and professionals studying in the field of migration and international organisations

War, Technology, Anthropology Koen Stroecken, 2011-12-01 Technologies of the allied warfare in Iraq and Afghanistan such as remote controlled drones and night vision goggles allow the user to virtualize human targets This coincides with increased civilian casualties and a perpetuation of the very insecurity these technologies are meant to combat This concise volume of research and reflections from different regions across Asia the Middle East Latin America and Africa observes how anthropology operates as a technology of war It tackles recent theories of humans in society colluding with imperialist claims including anthropologists who have become involved professionally in warfare through their knowledge of cultures renamed as human terrain systems The chapters link varied yet crucial domains of inquiry from battlefields technologies military driven scientific policy and economic warfare to martyrdom cosmology shifts media coverage of distant wars and the virtualizing techniques and war porn soundtracks of the gaming industry

Crypto Crowds Matan Shapiro, 2024-03-15 Ownership of cryptocurrencies features contrasting forms of mobilization On one hand it denotes association with a global crowd of unrelated individual investors which expands as it

Moral Anthropology Bruce Kapferer, Marina Gold, 2018-04-13 A development in anthropological theory characterized as the moral turn is gaining popularity and should be carefully considered In examining the context arguments and discourse that surrounds this trend this volume reconceptualizes the discipline of anthropology in a radical way Contributions from anthropologists from around the world from different theoretical traditions and with expertise in a multiplicity of ethnographic areas makes this collection a provocative contribution to larger discussions not only in anthropology but the social sciences more broadly

Sustainable Development Paul Sillitoe, 2014-08-01 With growing evidence of unsustainable use of the world's resources such as hydrocarbon reserves and related environmental pollution as in alarming climate change predictions sustainable development is arguably the prominent issue of the 21st century This volume gives a wide ranging introduction focusing on the arid Gulf region where the challenges of sustainable development are starkly evident The Gulf relies on non renewable oil and gas exports to supply the world's insatiable CO2 emitting energy demands and has built unsustainable conurbations with water supplies dependent on energy hungry desalination plants and deep aquifers pumped beyond natural replenishment rates Sustainable Development has an interdisciplinary focus bringing together university faculty and government personnel from the Gulf Europe and North America including social and natural scientists environmentalists and economists architects and planners to discuss topics such as sustainable natural resource use and urbanization industrial and technological
