GET YOUR COPY TODAY Towards an Understanding of the Cognitive Mechanisms Involved in Threat Processing and Perception Andras Norbert Zsido, Carlos M. Coelho, David S. March, Michael Craig Hout, Jakub Polák, 2024-06-05 Much remains unknown about the cognitive mechanisms and information processing biases involved in threat detection or the acquisition and maintenance of threat associations To complicate the picture these mechanisms and biases likely differ between various types of threats e g those originating from animals weapons social situations or groups There has been a recent push to highlight ways of improving methods used in research in this area which has likewise prompted theoretical revisions It is therefore important to continue clarifying the cognitive mechanism e g perception attention memory learning underlying threat processing to develop a better understanding of how they affect social outcomes For example very little is known about how social identity hierarchy group structure and other social cues affect our responses in threatening situations As the social environment impacts our daily psychological functioning one might suspect it has an important role in threat processing as well *Cognitive Neuroscience, Development, and Psychopathology* Jacob A. Burack, James T. Enns, Nathan A. Fox, 2012-07-24 The disciplines of cognitive neuroscience development and psychopathology are complementary in the study of human perception and attention even though each discipline emerges from a decidedly different and sometimes incompatible worldview The meeting of researchers across these disciplines results in a fruitful cross fertilization that ultimately leads to better science within each discipline and a joint scientific endeavor that is greater than the sum of its parts Cognitive Neuroscience Development and Psychopathology Typical and Atypical Developmental Trajectories of Attention unites scholars sharing common interests in the development of attention and related areas of functioning with different perspectives and methodologies The volume does not impose a single framework for discussing the relevant issues but rather the authors highlight the importance of their own approaches to the study of the typical and atypical development of attention Drs Burack Enns and Fox have organized the chapters into three sections Atypical Environments Threat and the Development of Individual Differences in Attention The Organization of the Development of Attention in Typical and Atypical Processing and The Case of Orienting Attention in Developing an Integrated Science Discussion topics include cognitive bias modification attention and the development of anxiety disorders deficient anchoring reflexive and abnormal social orienting in autism and social attention This volume is a unique and critical resource for researchers in communication disorders developmental and cognitive psychology human development neuroscience and educational and counseling psychology **Stopping Anxiety Medication** Michael W. Otto, Mark H. Pollack, 2009 Now in its second edition Stopping Anxiety Medication updates and enhances this comprehensive and effective program The guide is to
