Buckets from an English Sea Louis Barry Rosenblatt, 2018 As author Lou Rosenblatt explains the year 1832 in Darwin's life was crucial for the development of his theory of evolution A century and a half of study of Darwin the man and his work including close readings of his books notebooks letters and even the books he read has led to a working appreciation of his genius The success of this account has however kept us from seeing several important issues most notably why did he pursue evolution in the first place While this book is neither an almanac of 1832 nor a biography of Charles Darwin though both are at the heart of Rosenblatt's work Buckets from an

English Sea offers a unique take on the factors that shaped Darwin's legendary theory and the making of him as a scientist

Dust jacket **Science and Affect in Contemporary Literature** Shannon Lambert, 2024-11-14 Moving from the micro world of quantum physics to the macro scales of earth science and ecology this book considers how in contemporary literature affective experiences like desire suffering anxiety and joy shape scientific persons practices and products This book brings into dialogue close readings of scientific writing and contemporary literary works by authors like Jeanette Winterson Richard Powers Hanya Yanagihara Thalia Field and Jenny Offill Combining narrative and affect studies it uses formal strategies such as moving metaphor visceral or affective description plot level analogy contraction and rhythm to engage with western scientific epistemologies which still tends towards the impassive universal and objective While each chapter focuses on a different field or fields of science all foreground bodies human and nonhuman as a way of exploring knowledge production Through close readings the book argues that select scientific stories raise important questions about how knowledge is defined and who and what is invited into its processes of production *Online Searching* Karen Markey, 2023-02-07 Online Searching prepares students in library and information science programs to assist information seekers at all levels from university faculty to elementary school students Included in the third edition are interviews with librarians and other information professionals whose words of wisdom broaden graduate students perspectives regarding online searching in a variety of work settings serving different kinds of information seekers The book's chapters are organized according to the steps in the search process 1 Conducting a reference interview to determine what the seeker wants 2 Identifying sources that are likely to produce relevant information for the seeker's query 3 Determining whether the user seeks a known item or information about a subject 4 Dividing the query into main ideas and combining them logically 5 Representing the query as input to the search system 6 Conducting the search and responding strategically 7 Displaying retrievals assessing them and responding tactically A new chapter on web search engines builds on students existing experience with keyword searching and relevance ranking by introducing them to more sophisticated techniques to use in the search box and on the results page A completely revised chapter on assessing research impact discusses the widespread use of author and article iMetrics a trend that has developed rapidly since the publication of the second edition More than 100 figures and tables provide readers with visualizations of concepts and examples of real searches and actual results Textboxes offer additional topical details and professional insights New videos supplement the text by delving more deeply into topics such as database types information organization specialized search techniques results filtering and the role of browsing in the information seeking process An updated glossary makes it easy to find definitions of terms used throughout the book With new and updated material this edition of Online Searching gives students knowledge and skills for success when intermediating between information seekers and the sources they need 4Th Michael Ebifegha, 2017-12-20 4th Refuting the Myth of Evolutionism and Exposing the Folly of Clergy Letters The Darwinian theory of evolution begins with

facts science of microevolution and ends with fiction myths of macroevolution The myths are part of our experience no transitional organisms in the living world and part of our discoveries no transitional fossils in such deposits at the Burgess Shale and Chengjiang sites where various kinds of organisms appear together in large collection In his fourth book *Refuting the Myth of Evolutionism and Exposing the Folly of Clergy Letters* author Michael Ebifegha stresses that real science is timeless and based on events that are directly or indirectly observable testable and repeatable Challenging evolutionists and their clerical allies who are banning the teaching of creationism in public schools Ebifegha insists that evolutionism is also outside sciences purview and therefore should be banned as well He reprimands clerics for capitalizing on human knowledge but failing to recognize the validity of Gods personal claim in speech before an audience and in print on stone tablets for having created the world These interventions he asserts fulfills the worlds standard legal requirement for inventors Ebifegha argues that the inconsistency of imposing evolutionism as scientific truth on the public and banning creationism violates 1 the academic rights of accomplished scientists who disagree with evolutionism on scientific grounds 2 the US Supreme Courts 1992 declaration At the heart of liberty is the right to define ones own concept of existence of meaning of the universe and of the mystery of human life and 3 Gods historical claim to ownership of the universe Instead of separation of church and state Ebifegha recommends separation of worldviews and state *Advances in Contemplative Science* Javier

Garcia-Campayo,Roberto Aristegui,Jesus Montero-Marin,2025-02-03 Over the last twenty years a great amount of research has been conducted in the field of Contemplative Science CS considered a crossroads between contemplative spiritual traditions and neuroscience This is a relatively heterogeneous discipline that includes quite different techniques mindfulness compassion body mind techniques etc distinct approaches from secular to religious traditions Buddhism Vedanta shamanism monotheistic religions etc and different sets of terminology that frequently require clarification One of the more challenging features of CS is its methodology given the difficulty involved in assessing its introspection dimension The consequence of all these aspects is that CS has become one of the newest and most interesting fields of research in psychology **Analysing**

Architecture Simon Unwin,2020-12-29 Now in its fifth edition *Analysing Architecture* has become internationally established as the best introduction to architecture Aimed primarily at those studying architecture it offers a clear and accessible insight into the workings of this rich and fascinating subject With copious illustrations from his own notebooks the author dissects examples from around the world and all periods of history to explain the underlying strategies in architectural design and show how drawing may be used as a medium for analysis In this new edition *Analysing Architecture* has been revised and expanded Notably the chapter on How Analysis Can Help Design has been redeveloped to clearly explain this crucially important aspect of study to a beginner readership Four new chapters have been added to the section dealing with Themes in Spatial Organisation on Axis Grid Datum Place and Hidden Material from the Case Studies in previous editions has been redistributed amongst earlier chapters The Introduction has been completely rewritten and the

format of the whole book has been adjusted to allow for the inclusion of more and better illustrative examples Works of architecture are instruments for managing orchestrating modifying our relationship with the world around us They frame just about everything we do Architecture is complex subtle frustrating but ultimately extremely rewarding It can be a difficult discipline to get to grips with nothing in school quite prepares anyone for the particular demands of an architecture course But this book will help www.instagram.com/analysingarchitecture **Creativity & Resilience** Eduarda Santos,2024-09-07
