Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2022-04-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al 2014, Wong et al 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al 2021, Seaman et al 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, Gunning, Duran, Duran, 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation. The ABCs of CBM Michelle K. Hosp, John L. Hosp, Kenneth W. Howell, 2016-02-26 Curriculum-based measurement (CBM) has been adopted by growing numbers of school districts and states since the publication of this definitive practitioner guide and course text. The second edition presents step-by-step guidelines for using CBM in screening, progress monitoring, and data-based instructional decision making in PreK-12. It describes the materials needed and all aspects of implementation in reading, spelling, writing, math, and secondary content areas. Twenty sets of reproducible CBM administration and scoring guides and other tools are provided. The large size format facilitates photocopying. Purchasers get access to a webpage where they can download and print the reproducible materials. New to This Edition: Broader grade range now has a chapter on secondary content areas. Chapter on early numeracy expanded content on early reading. Nearly twice as many reproducible tools, including new or revised administration and scoring guides. Key updates on graphing and on using online CBM databases. This book is in The Guilford Practical Intervention in the Schools Series, edited by Sandra M. Chafouleas. See also The ABCs of Curriculum-Based Evaluation by John L. Hosp, Michelle K. Hosp, Kenneth W. Howell, and Randy Allison, which presents an overarching problem-solving model that utilizes CBM.
