Computational Intelligence for Society 5.0 Pandey, Rajiv, Srivastava, Nidhi, Prasad, Rajesh, Prasad, Jayashree, Garcia, Manuel B., 2024-11-29 As technology rapidly advances the complexity of societal challenges grows necessitating intelligent solutions that can adapt and evolve However developing such solutions requires a deep understanding of computational intelligence CI and its application in addressing real world problems Moreover ethical considerations surrounding AI such as bias and accountability are crucial to ensure responsible development and deployment of intelligent systems Open AI and Computational Intelligence for Society 5.0 offers a comprehensive exploration of CI providing insights into intelligent systems theory design and application This book is a practical guide for scientists engineers and researchers seeking to develop thoughtful solutions for complex societal issues Integrating disruptive technologies and frameworks illuminates the path toward creating intelligent machines collaborating with humans to enhance problem solving and improve quality of life

Empire of AI Karen Hao, 2025-05-20 An Instant New York Times Bestseller A bestselling page turner that has made waves not just in Silicon Valley but around the world With *Empire of AI* Hao is fundamentally shaping many people's perceptions and understanding of the company at the center of the AI revolution TIME Magazine TIME100 AI 2025 Excellent and deeply reported Tim Wu The New York Times Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us Vulture Hao's reporting inside OpenAI is exceptional and she's persuasive in her argument that the public should focus less on AI's putative sentience and more on its implications for labor and the environment Benjamin Wallace Wells New Yorker From a brilliant longtime AI insider with intimate access to the world of Sam Altman's OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the

story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era

cutting edge AI methodologies algorithms and technologies providing readers with a deep understanding of the current landscape and future trends in AI research and development This book covers topics such as smart farming machine learning and deep neural networks and is a useful resource for computer engineers scientists medical professionals agriculturalists educators researchers academicians and business owners

The Fourth Age Byron Reese,2018-04-24 The Fourth Age not only discusses what the rise of A I will mean for us it also forces readers to challenge their preconceptions And it manages to do all this in a way that is both entertaining and engaging The New York Times As we approach a great turning point in history when technology is poised to redefine what it means to be human The Fourth Age offers fascinating insight into AI robotics and their extraordinary implications for our species In The Fourth Age Byron Reese makes the case that technology has reshaped humanity just three times in history 100 000 years ago we harnessed fire which led to language 10 000 years ago we developed agriculture which led to cities and warfare 5 000 years ago we invented the wheel and writing which lead to the nation state We are now on the doorstep of a fourth change brought about by two technologies AI and robotics The Fourth Age provides extraordinary background information on how we got to this point and how rather than what we should think about the topics we ll soon all be facing machine consciousness automation employment creative computers radical life extension artificial life AI ethics the future of warfare superintelligence and the implications of extreme prosperity By asking questions like Are you a machine and Could a computer feel anything Reese leads you through a discussion along the cutting edge in robotics and AI and provides a framework by which we can all understand discuss and act on the issues of the Fourth Age and how they ll transform humanity

Technology and the Rise of Great Powers Jeffrey Ding,2024-08-20 Technological revolutions have long been understood as one of the key factors affecting the rise of great powers Yet when these dynamics have been studied the focus tends to be on the moment of innovation where was a key technology invented In this book Jeffrey Ding argues that it s not innovation but rather the way a technology diffuses through a country that determines whether and how it strengthens the state The result is a new way to consider how technology and power have played out over history and what this might mean for the future To make this case Ding first outlines a new theory that centers on not the creation of new technology but its spread across society looking specifically at the role of education in promoting technological skill and literacy He then shows how this approach changes our understanding of three canonical cases Britian s rise during the first industrial revolution America s rise during the second industrial revolution and Japan s rise and decline during the third industrial revolution He then expands out to consider what this theory would predict for the coming competition between the United States and China in an AI driven fourth industrial revolution The result is an ambitious wide ranging take on how technology shapes world order Provided by publisher

Data Labeling in Machine Learning with Python Vijaya Kumar Suda,2024-01-31 Take your data preparation machine learning and GenAI skills to the next level by learning a range of Python algorithms and tools for data labeling Key Features Generate labels for regression in scenarios

with limited training data Apply generative AI and large language models LLMs to explore and label text data Leverage Python libraries for image video and audio data analysis and data labeling Purchase of the print or Kindle book includes a free PDF eBook Book Description Data labeling is the invisible hand that guides the power of artificial intelligence and machine learning In today s data driven world mastering data labeling is not just an advantage it s a necessity Data Labeling in Machine Learning with Python empowers you to unearth value from raw data create intelligent systems and influence the course of technological evolution With this book you ll discover the art of employing summary statistics weak supervision programmatic rules and heuristics to assign labels to unlabeled training data programmatically As you progress you ll be able to enhance your datasets by mastering the intricacies of semi supervised learning and data augmentation Venturing further into the data landscape you ll immerse yourself in the annotation of image video and audio data harnessing the power of Python libraries such as seaborn matplotlib cv2 librosa openai and langchain With hands on guidance and practical examples you ll gain proficiency in annotating diverse data types effectively By the end of this book you ll have the practical expertise to programmatically label diverse data types and enhance datasets unlocking the full potential of your data What you will learn Excel in exploratory data analysis EDA for tabular text audio video and image data Understand how to use Python libraries to apply rules to label raw data Discover data augmentation techniques for adding classification labels Leverage K means clustering to classify unsupervised data Explore how hybrid supervised learning is applied to add labels for classification Master text data classification with generative AI Detect objects and classify images with OpenCV and YOLO Uncover a range of techniques and resources for data annotation Who this book is for This book is for machine learning engineers data scientists and data engineers who want to learn data labeling methods and algorithms for model training Data enthusiasts and Python developers will be able to use this book to learn data exploration and annotation using Python libraries Basic Python knowledge is beneficial but not necessary to get started *The Hitchhiker's Guide to ChatGPT* Devin Schumacher, Francis LaBounty Jr., 2023-02-25 Everything You Need to Know to Get Started Using ChatGPT to VASTLY Improve Your Efficiency Profit ROI in Your Business Or Start a New Business Create Additional Revenue Streams Fully Leverage Artificial Intelligence to Make Your Life Better Artificial Intelligence is HERE And there s not much artificial about it Used Correctly AI Will Help You Produce More With AI you can automate repetitive and time consuming tasks freeing up time to focus on creative and fulfilling work This can enhance your personal happiness and fulfillment while increasing productivity and efficiency in the workplace Earn More AI can increase productivity and efficiency leading to greater income potential You can also use AI powered financial management tools to better manage your finances and make better investment decisions potentially leading to greater wealth accumulation and financial freedom Live More Automate menial and trivial tasks you can create more balance in your life and spend more time on what matters most such as family hobbies and personal development This can increase overall happiness and fulfillment Enjoy More More time means more pursuit of

your passions interests ultimately leading to greater fulfillment and happiness And that just scratches the surface IN THIS BOOK Intro to AI ChatGPT Get ahead of the competition and transform your business with the power of AI even if you have no prior experience or technical expertise Unlock unlimited possibilities for your business driving growth and success like never before Real life Examples for Every industry Discover the many ways that AI can revolutionize your industry from improving healthcare outcomes and streamlining finance to enhancing customer service and increasing productivity Prompts Harness the true power of AI by understanding the importance of prompts which can help you achieve extraordinary results from personalized customer experiences to more accurate data analysis Prompt Engineering Become a master of prompt engineering and create tailored prompts that make your AI powered applications more effective and efficient No prior engineering experience needed Prompt Examples Plug play prompts you can use these examples to inspire your own winning prompts creating a competitive edge that sets your business apart from the rest Jailbreaking Unleash the full potential of AI by breaking free from traditional limitations and creating innovative solutions that push the boundaries of what s possible in your industry Tools Extensions Enhancements Access a wealth of tools extensions and add ons that can help you maximize the benefits of AI and ChatGPT driving greater results and generating more revenue no technical knowledge required Access to a community of experts Get support and guidance from a community of AI and ChatGPT experts helping you overcome challenges and make the most of this transformative technology practically instantly Ensure your business is always on the cutting edge of AI innovation Hundreds of business use cases ideas for making money with ChatGPT Tap into an endless supply of ideas and strategies for using ChatGPT to grow your business and generate more revenue from optimizing workflows and increasing productivity to creating personalized customer experiences and increasing sales

Developing Apps with GPT-4 and ChatGPT Olivier Caelen,Marie-Alice Blete,2024-07-10 This book provides an ideal guide for Python developers who want to learn how to build applications with large language models Authors Olivier Caelen and Marie Alice Blete cover the main features and benefits of GPT 4 and GPT 3 5 models and explain how they work You ll also get a step by step guide for developing applications using the OpenAI Python library including text generation Q A and smart assistants Written in clear and concise language *Developing Apps with GPT 4 and ChatGPT* includes easy to follow examples to help you understand and apply the concepts to your projects Python code examples are available in a GitHub repository and the book includes a glossary of key terms Ready to harness the power of large language models in your applications This book is a must You ll learn Fundamentals and benefits of GPT 4 and GPT 3 5 models including the main features and how they work How to integrate these models into Python based applications leveraging natural language processing capabilities and overcoming specific LLM related challenges Examples of applications demonstrating the OpenAI API in Python for tasks including text generation question answering content summarization classification and more Advanced LLM topics such as prompt engineering fine tuning models for specific tasks RAG plug ins LangChain LlamaIndex GPTs and assistants Olivier

Caelen is a machine learning researcher at Worldline and teaches machine learning courses at the University of Brussels
Marie Alice Blete a software architect and data engineer in Worldline s R D department is interested in performance and latency issues associated with AI solutions
