good For decades now wealth and power have been shifting from states to markets This experiment has been a failure for all but a privileged few But this trend is beginning to reverse accelerated by the COVID 19 pandemic which has seen the state play the most direct and positive role in citizens everyday lives in living memory Graeme Garrard makes a powerful case for the state as our only realistic hope of countering the rising power of multinational corporations organized crime and international organizations that will always put their own interests first Today the state is essential to the health and welfare of everyone except the rich and powerful Yet it is being rolled back and whittled away leaving the well being of most of us at the mercy of unaccountable private powers that are increasingly free from external control As Garrard shows the state is the only realistic way of promoting the public good in our time
