Made in the U.S.A. United States. Congress. House. Committee on Small Business. Subcommittee on Economic Growth, Capital Access, and Tax, 2014 *The 10-Second Commute* Terri R. Kurtzberg, Mason Ameri, 2022-10-18 Virtual work which was steadily on the rise even before the pandemic is explored in this timely book that describes the impact of technology on our work experiences ranging from the individual psychological level to the broad societal implications Widespread remote work is now possible but it comes with its share of frustrations Virtual work has changed our lives in ways big and small from trying to balance our time to what we wear and where we sit and from how we communicate to where we should look during a videoconference It s also fundamentally changed what kinds of jobs we can now do Grounded in research and including lively personal anecdotes *The 10 Second Commute* provides a thoughtful and comprehensive scan of the nature of virtual work The authors both researchers in management and technology explore the current questions of our virtual lives such as Why Zoom instead of Skype Why are emojis so useful Why is videoconferencing so exhausting How does diversity at work both help and hinder productivity Virtual work is more than just work it permeates our whole lives and it will continue to do so as hybrid work arrangements become the new normal Helping readers better understand the virtual work experience this book will engage and inform everyone who is still trying to make it work **Make It In America, Updated Edition** Andrew Liveris, 2011-12-15 The case for revolutionizing the U S economy from a leading CEO America used to define itself by the things we built We designed and produced the world s most important innovations and in doing so created a vibrant manufacturing sector that established the middle class We manufactured our way to the top and became the undisputed economic leader of the world But over the last several decades and especially in the last ten years the sector that was America s great pride has eroded costing us millions of jobs and putting our long term prosperity at risk Now as we struggle to recover from the worst recession in generations our only chance to turn things around is to revive the American manufacturing sector and to revolutionize it In *Make It in America The Case for Reinventing the Economy* Andrew Liveris Chairman and CEO of The Dow Chemical Company offers a thoughtful and passionate argument that America s future economic growth and prosperity depends on the strength of its manufacturing sector The book explains how a manufacturing sector creates economic value on a scale unmatched by any other and how central the sector is to creating jobs both inside and outside the factory Explores how other nations are building their manufacturing sectors to stay competitive in the global economy and describes how America has failed to keep up Provides an aggressive practical and comprehensive agenda that will put the U S back on track to lead the world It s time to stop accepting as inevitable the shuttering of factories and staggering job losses that have come to define manufacturing It s time to acknowledge the cost of inaction There is no better company to make the case for reviving U S manufacturing than The Dow Chemical Company one of the world s largest manufacturers and most global corporations And there s no better book to show why it needs to be done and how to do it
