Kahn, 2025-07-08 A Fortune magazine journalist draws on his expertise and extensive contacts among the companies and
scientists at the forefront of artificial intelligence to offer dramatic predictions of AI's impact over the next decade from
reshaping our economy and the way we work learn and create to unknitting our social fabric jeopardizing our democracy and
fundamentally altering the way we think Within the next five years Jeremy Kahn predicts AI will disrupt almost every industry
and enterprise with vastly increased efficiency and productivity It will restructure the workforce making AI copilots a must
for every knowledge worker It will revamp education meaning children around the world can have personal portable tutors It
will revolutionize health care making individualized targeted pharmaceuticals more affordable It will compel us to reimagine
how we make art compose music and write and publish books The potential of generative AI to extend our skills talents and
creativity as humans is undeniably exciting and promising But while this new technology has a bright future it also casts a
dark and fearful shadow AI will provoke pervasive disruptive potentially devastating knock on effects Leveraging his
unrivaled access to the leaders scientists futurists and others who are making AI a reality Kahn will argue that if not carefully
designed and vigilantly regulated AI will deepen income inequality depressing wages while imposing winner take all markets
across much of the economy AI risks undermining democracy as truth is overtaken by misinformation racial bias and harmful
stereotypes Continuing a process begun by the internet AI will rewire our brains likely inhibiting our ability to think critically
to remember and even to get along with one another unless we all take decisive action to prevent this from happening Much
