Routledge Introduction to English Canadian Literature and Digital Humanities Paul Barrett, Sarah Roger, 2025-06-30

The Routledge Introduction to English Canadian Literature and Digital Humanities is a guide to the concepts and theories at the intersection of Canadian literary studies and digital humanities DH. Equal parts theoretical and practical, it focuses on debates that overlap the two domains. This book historicizes the connections between the two by surveying the history of DH in Canada, the tradition of Canadian writers engaging with technology, and DH analyses of Canadian literature. It also situates both CanLit and DH with respect to contemporary concerns about alterity and it demonstrates how digital technologies allow writers and scholars to intervene in them. This book complements its theoretical discussions with a practical introduction to DH methods. Using Canadian literary texts and examples from projects at the intersection of CanLit and DH, it introduces key DH approaches to novice readers. Topics covered include data collection, data management, and textual analysis, as well as essential DH tools and the Python programming language. A concluding case study guides readers interested in applying the ideas presented throughout.

Artificial Intelligence in the Cultural and Creative Sectors Marta Massi, Marek Prokúpek, Alessandra Ricci, Maria Carmela Ostilio, 2025-11-13. This book explores how AI is redefining the creative and cultural sectors, reshaping how content is produced, distributed, experienced, and managed. Spanning areas such as publishing, heritage, music, performance, and design, the book offers the first comprehensive interdisciplinary examination of AI's impact across these diverse sectors as technologies become increasingly embedded in both creative and operational processes.

Artificial Intelligence and SMEs in Developing Economies Timilehin Olasoji Olubiyi, Tulus T.H. Tambunan, 2025-06-27. Artificial Intelligence and SMEs in Developing Economies explores the emergence and application of Artificial Intelligence in developing economies. This is in response to the shift in Artificial Intelligence research towards the achievement of Sustainable Development Goals (SDGs) as well as the environmental problems and methods to solve them. Written by experts from around the globe from developing countries, the book contains a balance of theoretical and empirical chapters that explore Artificial Intelligence in the context of business. It focuses especially on integrating industry 5.0 where Artificial Intelligence plays a major role. The chapters include knowledge and applications for small businesses ranging from disruptive Artificial Intelligence technologies to determinants of Artificial Intelligence adoption in SMEs from major developing economies such as Africa, Latin America, and Asia. In the latter chapters, the book discusses the application of Artificial Intelligence such as how to leverage it for sustainable and responsible small businesses and the importance of appreciating it in a business environment. This book is the first substantial study on Artificial Intelligence and the future of sustainable small businesses in emerging economies. It is a useful resource for academics and university students with interest in Artificial Intelligence and sustainable small businesses, specifically small business development. It is also a valuable read for policy makers and SME stakeholders.

Artificial Intelligence 'Arms Dynamics': The Case Of The U.S. And China Rivalry Gloria Shkurti Özdemir, Artificial Intelligence AI has undergone rapid evolution not only by penetrating every aspect of our life but also by transitioning from theoretical concepts to foundational components of modern military strategy This book focuses into the heart of this evolution focusing on the escalating AI arms rivalry between the U S and China Drawing upon Barry Buzan s theoretical frameworks this book aims to analyze if there is an AI arms race between the U S and China as a part of the ongoing great power competition Findings from the study indicate that both countries perceive AI as a pivotal element of future warfare and national security leading to significant investments in research and development The U S with its historically dominant military technological edge seeks to maintain its superiority through innovation and strategic partnerships Conversely China s ambitious AI strategy aims to establish its leadership in AI technology by 2030 challenging

U S dominance and reshaping the global security landscape The analysis reveals that rather than an AI arms race where the possibility for warfare should be high the rivalry between U S China is more an AI arms competition with both states not willing to start a direct war with each other at least for the short term Furthermore the study finds out that the AI arms competition between both states is driven by both external threats and internal motivations however the technological imperative which is considered as an independent variable is the main driving force behind this rivalry In conclusion the research suggests that the AI arms competition between the U S and China is a defining feature of contemporary international security dynamics with profound implications for global stability
