Transforming Vocational Education and Training Using AI Çela, Eriona,Vajjhala, Narasimha Rao,Potluri, Rajasekhara Mouly,Eappen, Philip,2024-12-16 Vocational Education and Training VET is evolving with the advancements made in artificial intelligence AI There is a need to transform the existing VET programs that are following a traditional model into a dynamic and AI enhanced learning environment as industries are increasingly using AI technologies In the areas of automation and AI major changes have taken place resulting in a skill gap that can be addressed by modernizing the existing VET programs Further research into AI integration may help foster lifelong learning opportunities and empower vocational educators to help students thrive in a digital world Transforming Vocational Education and Training Using AI examines the need for updating VET with AI to prepare the future workforce with the necessary skillsets It addresses the gap in the current educational frameworks and presents innovative strategies and practical applications highlighting how AI can be used to improve delivery of VET programs This book covers topics such as cybersecurity e learning and career training and is a useful resource for business owners computer engineers researchers scientists academicians and educators **Exploring the Cybersecurity Landscape Through Cyber Forensics** Husain, Mohd Shahid,2025-02-20 As digital technology becomes integral to all aspects of modern life the ability to investigate and resolve cyber related incidents through systematic and scientifically grounded methods has never been more essential Cyber forensics is indispensable for investigating and addressing cyber incidents with scientific rigor and legal integrity By adhering to core principles employing systematic methodologies and leveraging specialized tools cyber forensic professionals play a key role in uncovering digital evidence and resolving cyber related challenges Despite ongoing challenges the field remains vital for maintaining security and integrity in our increasingly digital world Exploring the Cybersecurity Landscape Through Cyber Forensics delves into the intricacies of cyber forensics offering insights and methodologies essential for uncovering and interpreting digital evidence in today s technologically advanced landscape It explores the latest trends and challenges in the field of cyber forensics ensuring that readers gain a thorough understanding of the subject and are equipped with the state of the art knowledge needed to navigate the evolving landscape of digital investigations Covering topics such as AI ethics cloud environment and social media forensics this book is an excellent resource for professionals researchers students and more Proceedings of the International Conference on Education Research Reza Hosseini, *Artificial Intelligence in Pathogenic Microorganism Research* Chen Li,Yu-Dong Yao,Marcin Grzegorzec,2025-05-26 Infections caused by pathogenic microorganisms including bacteria viruses fungi and other eukaryotic microbes seriously threaten human health Traditional research methods and laboratory techniques have many limitations and focus more on the identification and classification of pathogenic

microorganisms In recent years technologies such as whole genome sequencing and advanced bioinformatics analysis have promoted the research of pathogenic microorganisms However with the interplay of multiple factors like global climate change ecological and environmental changes urbanization social behavior and lifestyle changes pathogenic microorganisms transmission patterns and impact scope are gradually changing There is an urgent need for multidimensional technological approaches to achieve epidemiological monitoring and evolutionary direction prediction of pathogenic microorganisms Additionally more robust data processing and analysis capabilities are required for rapid identification and diagnosis monitoring of drug resistance development of antimicrobial drugs and vaccines and optimization of treatment plans Therefore Artificial Intelligence AI has entered our field of vision In the field of pathogenic microorganisms AI has shown tremendous potential In epidemiological research AI technology can quickly and automatically collect integrate and analyze the epidemic data of infectious diseases from different regions so as to predict the trend and scope of disease transmission and track the source of infection In the process of diagnosis and treatment of infectious diseases machine learning can not only analyze the microscopic images of pathogens but also analyze the genome sequences of multiple pathogens in a short time and predict their sensitivity or resistance to specific antibiotics greatly improving the efficiency and accuracy of diagnosis and treatment of infectious diseases In drug or vaccine development researchers can use AI models to predict efficient antigens for diseases such as HIV and influenza and thus design more effective vaccine candidates AI models can also analyze the interactions between drugs pathogens and patients in order to design the optimal dosing regimen for each patient In a word AI can help human beings better deal with infectious diseases We welcome original reviews articles and other contributions in related fields which mainly include the following aspects 1 The application of AI in the differential diagnosis of pathogenic microorganisms 2 The application of AI in the formulation of anti infection treatment plans 3 The application of AI in monitoring and predicting the prevalence of pathogenic microorganisms 4 Application of AI in the prediction and prevention of infectious diseases caused by pathogenic microorganisms 5 The application of AI in the research and development of anti infective drugs and vaccines
