Kritische Film- und Literaturedition Ursula von Keitz, Wolfgang Lukas, Rüdiger Nutt-Kofoth, Ulrich Rummel, 2022-07-05 Während sich die literaturwissenschaftliche Editionswissenschaft nach wie vor am Modell der in den letzten 200 Jahren entwickelten Historisch-kritischen Ausgabe orientiert stehen die audiovisuellen Medienwissenschaften im Hinblick auf die Edition zeitbasierter Medien in der Entwicklung solcher Instrumentarien erst am Anfang. Die Tradierung des kulturellen Erbes in Form von Editionen betrifft aber beide Disziplinen und insbesondere auch diejenigen Institutionen Archive und Museen die das kulturelle Erbe aufbewahren und sichern. Zugleich eröffnen sich der Editionspraxis im Zeitalter der Digitalisierung jenseits von Buch und linearem Film neue Möglichkeiten der Aufbereitung mediengenerischen Modellierung und Präsentation die aber auch neue Kooperationen zwischen Philologien Filmwissenschaft Informatik Medientechnologie und Archiv erfordern. Der Band führt seine Beiträge unter den Rubriken Theorie und Methodologie Archivpraxen und Kritische Filmographie Edition von Proskripten Digitale Filmeditorik und Sprache und Musik in der Filmedition mit dem Ziel zusammen einen Dialog über theoretische Grundlagen Methoden und Praktiken kritischen Edierens in digitalen Umgebungen zu führen und Anstöße zu einer transdisziplinären Editorik zu entwickeln. Zum ersten Mal steht die Filmeditorik im Mittelpunkt eines solchen disziplinen bergreifenden Fachgesprächs.

Digital Marketing Klaus Solberg Söilen, 2024-12-02 This textbook balances the theory of digital marketing with the practical skills for prospective marketers in professional organizations both public and private. It begins with an introduction to the digital landscape following the structure of market segmentation B2C B2B applications as a starting point of digital marketing. It then takes the readers through the customer journey use of social media and the rising importance of video based communication. Given this background students will learn the organization technical skills and project management needed for digital marketing including online public relations communications and internet branding. An extensive summary of strategies necessary to work with digital marketing in a longer perspective is also provided.

Media Libraries in an Age of Unending Consumption Mike Van Esler, 2023-10-24 As the home video market upended traditional film industry models media libraries emerged as important sources of ancillary revenue. The inflection point for media library exploitation came in 2007 when Netflix launched its streaming service relying on extensive licensing of film and television libraries to grow its subscriber base. In this book Mike Van Esler examines how media libraries and business models have evolved since the home video era with particular emphasis placed on the streaming age of the past fifteen years. Van Esler argues that media libraries have grown beyond their usages from the pre home video era to become central to today's corporate media strategy. By studying the ways in which media library exploitation has scaled up since the turn of the new millennium the author identifies insights into larger media industry trends. Ultimately this book explores the intersection of corporate media independent distributors private equity tech companies and audiences. Scholars of media studies business and sociology will find this book of particular interest.

Unsteady Viscous Flows Demetri P.

Telionis,2012-12-06 Most of the fundamental concepts of unsteady viscous flows have been known since the early part of the century However the past decade has seen an unprecedented number of publications in this area In this monograph I try to connect materials of earlier contributions and synthesize them into a comprehensive entity One of the main purposes of a monograph in my opinion is to fit together in a comprehensive way scattered contributions that provide fragmented information to the readers The collection of such contributions should be presented in a unified way continuity of thought and logical sequence of the presentation of ideas and methods are essential The reader should be able to follow through without having to resort to other references something that is unavoidable in the case of a research paper or even a review paper Many of the solutions discussed in the literature address specific practical problems In fact in the process of collecting information I discovered independent lines of investigations dealing with the same physical problem but inspired by different practical applications For example I found that two groups of investigators have been studying independently the response of a viscous layer to a harmonic external disturbance One group is concerned with mass transport and the transport of sediment over the bottom of the ocean and the other is interested in the aerodynamics of lifting surfaces in harmonically changing environments
