Cossen,2023-08-15 In Making Catholic America William S Cossen shows how Catholic men and women worked to prove themselves to be model American citizens in the decades between the Civil War and the Great Depression Far from being outsiders in American history Catholics took command of public life in the early twentieth century claiming leadership in the growing American nation They produced their own version of American history and claimed the power to remake the nation in their own image arguing that they were the country s most faithful supporters of freedom and liberty and that their church had birthed American independence Making Catholic America offers a new interpretation of American life in the Gilded Age and Progressive Era demonstrating the surprising success of an often embattled religious group in securing for itself a place in the national community and in profoundly altering what it meant to be an American in the modern world

go to college The Tyranny of the Meritocracy Lani Guinier, 2016-01-12 A fresh and bold argument for revamping our standards of merit and a clear blueprint for creating collaborative education models that strengthen our democracy rather than privileging individual elites Standing on the foundations of America's promise of equal opportunity our universities purport to serve as engines of social mobility and practitioners of democracy But as acclaimed scholar and pioneering civil rights advocate Lani Guinier argues the merit systems that dictate the admissions practices of these institutions are functioning to select and privilege elite individuals rather than create learning communities geared to advance democratic societies Having studied and taught at schools such as Harvard University Yale Law School and the University of Pennsylvania Law School Guinier has spent years examining the experiences of ethnic minorities and of women at the nation's top institutions of higher education and here she lays bare the practices that impede the stated missions of these schools Goaded on by a contemporary culture that establishes value through ranking and sorting universities assess applicants using the vocabulary of private highly individualized merit As a result of private merit standards and ever increasing tuitions our colleges and universities increasingly are failing in their mission to provide educational opportunity and to prepare students for productive and engaged citizenship To reclaim higher education as a cornerstone of democracy Guinier argues that institutions of higher learning must focus on admitting and educating a class of students who will be critical thinkers active citizens and publicly spirited leaders Guinier presents a plan for considering democratic merit a system that measures the success of higher education not by the personal qualities of the students who enter but by the work and service performed by the graduates who leave Guinier goes on to offer vivid examples of communities that have developed effective learning strategies based not on an individual's merit but on the collaborative strength of a group learning and working together supporting members and evolving into powerful collectives Examples are taken from across the country and include a wide range of approaches each innovative and effective Guinier argues for reformation not only of the very premises of admissions practices but of the shape of higher education itself College Disrupted Ryan Craig, 2025-09-23 For nearly two decades pundits have been predicting the demise of higher education in the United States Our colleges and universities will soon find themselves competing for students with universities from around the world With the advent of massive open online courses MOOCs over the past two years predictions that higher education will be the next industry to undergo disruption have become more frequent and fervent Currently a university's reputation relies heavily on the four Rs in which the most elite schools thrive rankings research real estate and rah i e sports But for the majority of students who are not attending these elite institutions the four Rs offer poor value for the expense of a college education Craig sees the future of higher education in online degrees that unbundle course offerings to offer a true bottom line return for the majority of students in terms of graduation employment and wages College Disrupted details the changes that American higher education will undergo including the transformation from packaged courses and degrees to truly unbundled course offerings along with those that it

will not be written by a professional at the only investment firm focused on the higher education market College Disrupted takes a creative view of the forces roiling higher education and the likely outcome including light hearted real life anecdotes that illustrate the author's points A Is for Admission Michele A. Hernández, 2010-10-28 A former admissions officer at Dartmouth College reveals how the world's most highly selective schools really make their decisions **Indianapolis Monthly**, 2001-04 Indianapolis Monthly is the Circle City's essential chronicle and guide an indispensable authority on what's new and what's news Through coverage of politics crime dining style business sports and arts and entertainment each issue offers compelling narrative stories and lively urbane coverage of Indy's cultural landscape **Piece to Text on the Monument and One: Letters with the International Body Managers** Kiyoun Kim, 2018-08-17 The aims of this book is clear and straightforward It was motivated to convert an inhumane or insipid experience with the various sources of global ranking into the kind of humanly and cultural experience within our daily lifestyle Their outlook from presentation is masked with the number purely and perhaps through a myriad of complicated data or ranking information The concept or self identification within the experience or exposure would be less substantial or hard to get palpable My attempt to improve this aspect of contemporary practice certainly will fall short but you can sense in some paragraphs or titles I wrote this small piece of book in the end to take care of human integrity and stories for advancing the inherence and liveliness of interested actors or consumers despite all the wind heads from the turf of existing ranking sources **Schools and Society: A Sociological Approach to Education** Jeanne H.
