Producing Precarity Curtis Marez, 2025-08-26 The hidden cost of TV production for communities of color Producing

Precarity is a long overdue examination of the television industry's practice of offshoring production to impoverished sites within the US. The author, Curtis Marez, focuses on state efforts to attract film and TV producers to poor places with tax incentives, discounted public lands, and subsidized infrastructures. He argues that these efforts result in the redistribution of wealth from poor people of color, Indigenous people, and other taxpayers to Los Angeles-based media makers, while also diverting money that could be used for education and health care to the wealthy. The popular series produced in these places, such as *Breaking Bad*, *The Watchmen*, *Lovecraft Country*, *The Walking Dead*, and *Vida*, are praised by critics and awards organizations and highlighted by streaming services for challenging genre, casting, and narrative conventions. However, many of these shows rely on racialized and gendered low-wage labor for production, and diversity, equity, and inclusion representations can sometimes perpetuate repression, such as depicting police as diversity champions. *Producing Precarity* examines how contemporary streaming shows from these areas promote racial inequality in ideology and content, as well as materially through their local production methods and perceptually through streaming distribution modes that discourage viewers from understanding how TV is made. Marez also provides examples of local resistance, including movements against a police training center and a film studio in Atlanta, as well as anti-gentrification movements in Latinx neighborhoods of LA.

Deconstructing Dads Laura Tropp, Janice Kelly, 2015-12-24 In the twenty-first century, fatherhood is shifting from simply being a sidekick in the parental team to taking center stage with new expectations of involvement and caretaking. The social expectations of fathers start even before the children are born. Mr. Mom is now displaced with fathers who don't think of themselves as babysitting their own children but as central decision makers along with mothers as parents. *Deconstructing Dads: Changing Images of Fathers in Popular Culture* is an interdisciplinary edited collection of essays authored by prominent scholars in the fields of media sociology and cultural studies who address how media represent the image of the father in popular culture. This collection explores the history of representation of fathers, like the bumbling dad, to question and challenge how far popular culture has come in its representation of paternal figures. Each chapter of this book focuses on a different aspect of media, including how advertising creates expectations of play and father, crime shows, and the new hero father, and men as paternal figures in horror films. The book also explores changing definitions of fatherhood by looking at such subjects as how the media represents sperm donation as complicating the definition of father and how specific groups have been represented as fathers, including gay men as dads and Latino fathers in film. This collection examines the media's depiction of the good father to study how it both challenges and reshapes the ways in which we think of family, masculinity, and gender roles.
