The Future Church John L. Allen, Jr., 2009-11-10 One of the world's foremost religion journalists offers an unexpected and provocative look at where the Catholic Church is headed and what the changes will mean for all of us. What will the Catholic Church be like in 100 years? Will there be a woman pope? Will dioceses throughout the United States and the rest of the world go bankrupt from years of scandal? In **THE FUTURE CHURCH** John L. Allen puts forth the ten trends he believes will transform the Church into the twenty-second century. From the influence of Catholics in Africa, Asia, and Latin America on doctrine and practices to the impact of multinational organizations on local and ethical standards, Allen delves into the impact of globalization on the Roman Catholic Church and argues that it must rethink fundamental issues, policies, and ways of doing business. Allen shows that over the next century the Church will have to respond to changes within the institution itself and in the world as a whole, whether it is contending with biotechnical advances including cloning and genetic enhancement, the aging Catholic population, or expanding the roles of the laity. Like Thomas Friedman's *The World Is Flat*, **THE FUTURE CHURCH** establishes a new framework for meeting the challenges of a changing world. **Emerging Issues in**

Theological Bioethics Andrea Vicini, 2015-12 In light of Catholic and Christian theological bioethics and in dialogue with scientists and philosophers, this book studies the ethical issues raised by five areas of biotechnological development: global health, regenerative medicine, neuroscience, synthetic biology, and nanotechnology. **Hope from a Body in Pain** Lena

Maria Lorenz, 2025-12-03 This book explores the phenomenon of hope in the context of long-term ill health. It brings medicine, psychology, and theology in dialogue with the voices of those with first-hand experience of chronic pain. The chapters reflect on existing psychological literature on hope, the theological perspectives of three key figures: Augustine, Aquinas, and Moltmann, and interview-based empirical research with persons who live with chronic pain. In a theological framework, hope is a complex and dynamic force which incorporates and yet goes beyond any understandings within the cognitive-behavioural framework of psychology. The author challenges a highly individualistic and positivistic view on hope and argues for hope as intuitive, reflective, active, and communal. The book will be of particular interest to scholars working at the intersection of medicine, psychology, and theology, as well as those in the medical humanities. the next millennium is the ability to manipulate the genetics of living organisms. The possibility of manipulating human genetics raises many theological, ethical, and socio-political issues. These include specific decisions about whether the technology will be developed, how it will be applied, and more general questions about the technical manipulation of natural processes. From a theological perspective, the human genome project not only challenges particular doctrines such as that of creation, eschatology, and anthropology, but also raises particular issues of social justice and medical ethics. The purpose of

this book is to bring together the collective expertise of theologians scientists and social scientists in order to provide a forum for critique and public debate focused on the human genome project It is hoped that the results presented in this book offer a sophisticated theological and ethical response **Emerging Issues in Catholic Bioethics** Jason T.

Eberl,2026-01-14 Like its predecessor Contemporary Controversies in Catholic Bioethics this volume gathers together an array of Catholic scholars with expertise in theology philosophy medicine ethics health administration and pastoral care Expanding the range of bioethical issues from the previous volume the topics treated within this volume include transgender identity disability public and global health and artificial intelligence as well as specific controversies that arose during the COVID 19 pandemic concerning the allocation of scarce life sustaining resources and vaccination policies Drawing upon the Catholic Church s intellectual tradition and more recent bioethical teachings two chapters address each topic representing diverse sometimes divergent perspectives This volume will be a valuable resource for scholars in bioethics or Catholic studies who will benefit from the nuanced arguments offered based on the latest research This volume will also be instructive for students entering the field to become aware of the founding philosophical and theological principles informing the Catholic bioethical worldview **Cutting-edge Bioethics** John Frederic Kilner,C. Christopher Hook,Diane B. Uustal,2002 This book

from the Center for Bioethics and Human Dignity provides a faith based evaluation of recent technologies and trends in bioethics including the current debate surrounding stem cell research Fifteen noted scholars and medical practitioners discuss some of today s new and controversial work in biomedicine xenotransplantation artificial intelligence cybernetics and more and evaluate from a Christian perspective both the science and the ethical questions it raises Designed to orient general readers to the current state of biomedical research Cutting Edge Bioethics is must reading for anyone wishing to confront and wrestle with the challenging moral issues posed by this ever advancing field The New Testament and

Bioethics R. Dennis Macaleer,2014-01-01 Beauchamp and Childress s Principles of Biomedical Ethics is a well accepted approach to contemporary bioethics Those principles are based on what Beauchamp and Childress call the common morality This book employs New Testament theological themes to enhance the meaning of those principles of bioethics The primary New Testament text for this study is the twin commands from Jesus to love God and love one s neighbor The three theological themes developed from this study the image of God the covenant and the pursuit of healing are deeply embedded in the New Testament and in the ministry of Jesus Three contemporary bioethics principles are used for this dissertation based on The Belmont Report They are the principles of respect for persons justice and beneficence In each case the theological themes are shown to enhance the meaning of these bioethics principles Each of the three principles as understood through the three theological themes is applied to a current bioethics issue to demonstrate the efficacy of this approach The three current issues addressed are the withdrawal or withholding of life sustaining treatment the distribution of health care in the United States and the use of palliative care *Choose Life!* James McTavish,2012 *Bioethics and the Christian Life* David

VanDrunen,2009-10-07 Just about everyone will face a difficult bioethics decision at some point In this book a theologian ethicist and lawyer equips Christians to make such decisions based on biblical truth wisdom and virtue Though a relatively new discipline bioethics has generated extraordinary interest due to a number of socially pressing issues Bioethics and the Christian Life places bioethics within the holistic context of the Christian life both developing a general Christian approach to making bioethics decisions and addressing a number of specific controversial areas of bioethics Clear concise and well organized the book is divided into three sections The first lays the theological foundation for bioethics decision making and discusses the importance of wisdom and virtue in working through these issues The second section addresses beginning of life issues such as abortion stem cell research and infertility treatments The third section covers end of life issues such as living wills accepting and refusing medical treatment and treatment of patients in permanent vegetative states

Theological Issues in Bioethics Neil Messer,2002 This book is intended to address ethical and theological issues raised by the biological and medical sciences as these sciences affect human medicine and health care the human treatment of non human animals and our treatment of the whole created world Problems of Bioethics Lukas Ohly,2012 This book criticizes the suggestive implication of newer bioethics that we need a new ethical paradigm in order to handle with the innovations of medicine and biotechnology It holds that these innovations have a suggestive character at all which is not relevant however in order to justify a paradigm shift in ethics Especially the suggestions of reproduction genetics mercy killing and neuroscience reveal a misunderstanding about ethics Moreover they show inevitably theological implications they actually like to avoid especially in secular ethics
