Shoven, John Whalley, 2007-12-01 In the increasingly global economy domestic tax policies have taken on a new importance for international economics This unique volume compares the tax reform experiences of Canada and the United States two countries with the world s largest bilateral flow of trade and investment With the signing of the U S Canada Free Trade Agreement and the tax reforms of the 1980s there has been some harmonization of tax systems But geographic cultural and political characteristics shape distinct national social policies that may impede harmonization As the U S and Canadian economies become even more integrated differences in tax systems will

have important effects in particular on the relative rates of economic growth In this timely study scholars from both countries show that while the United States and Canada exhibit similar corporate tax structures and income tax systems they have very different approaches to sales tax and social security taxes Despite these differences the two countries generate roughly the same amounts of revenue produce similar costs of capital and produce comparable distributions of income *Poor-bashing* Jean Swanson,2001 The special language of poor bashing disguises the real causes of poverty hurts and excludes people who are poor cheapens the labour of people who have jobs and takes the pressure off the rich Swanson a twenty five year veteran of anti poverty work exposes the ideology of poor bashing in a clear forceful style She examines how media pornography operates when reporters cover poverty stories She also reveals how government and corporate clients use poor bashing focus groups To make the book even more useful Swanson includes key chapters on the history of poor bashing **Kiplinger's Personal Finance** ,2003-08 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics **OECD Economic Surveys: Korea 2008** OECD,2008-12-17 This 2008 edition of OECD s periodic review of Korea s economy looks at key challenges including reforming the tax system boosting productivity in the services sector and sustaining growth by reforming labour markets and improving education A Cross-Cultural Comparison of the American and Japanese Educational Systems ,1993-05 Presents a profile of the Japanese educational system and compares and contrasts it with the American system The objective is not to advocate the replication of the Japanese educational system and practices but to promote a better understanding of the strengths and weaknesses of both systems Charts and figures **Frontiers in the Economics of Aging** David A. Wise,2007-12-01 As America s population ages economic research related to the elderly becomes increasingly important to public policy *Frontiers in the Economics in Aging* directs attention to four topics the role of retirement accounts such as IRAs and 401 k s in personal saving the economics of health care new advances in research methodology and aging in relation to inequality Some of the issues analyzed within these topics are the implications of rising personal retirement saving in recent years how health and health insurance affect labor supply and the effects of pensions on the distribution of wealth David Wise s lucid introduction provides an overview of each paper In addition to this book s appeal for specialists and microeconomists it offers immediately practical ideas and methods for shaping public policy In fact one of the papers in this volume *The Taxation of Pensions A Shelter Can Become a Trap* helped to spur new legislation that reformed laws on pension distribution *America's Best Colleges* ,2003 Understanding School System Administration Kenneth A. Leithwood,Donald F. The Economics of Tax Policy Alan J. Auerbach, Kent Andrew Smetters, 2017 Debates about the optimal structure for tax policies and tax rates hardly cease among public policy or academic audiences These have only grown more heated in the United States as the gap between incomes of the wealthiest 1 percent and the rest of the population continue to diverge Tax research perhaps has not fully kept pace with the relentless demand of various interests to adjust tax policy Nonetheless specialists in the economics of tax policy in recent years have profited from advances in economic theory econometric measurements and data quality and access that are beginning to allow a greater consensus on what are the real effects of tax policy and how government levies affect individuals and businesses The volume edited by Professors Auerbach and Smetters represents an attempt to reduce the lag between the conduct of research on tax issues and its transmission to a broader public The contributions would explore highly topical issues such as the effects of income tax changes on economic growth the potential effects of capping certain tax expenditures the economics of adjusted business tax policy and environmental tax options Other essays would investigate perennially important themes such as the conduct of tax administration the growing role of the tax system on education policy tax policy toward low income families capital gains and estate taxation and tax policy for retirement savings A final paper would examine three different options for fundamental tax reform

Myth of Liberal Ascendancy G. Williams Domhoff, 2015-11-17 Based on new archival research G Williams Domhoff challenges popular conceptions of the 1930 s New Deal Arguing instead that this period was one of increasing corporate dominance in government affairs affecting the fate of American workers up to the present day While FDR s New Deal brought sweeping legislation the tide turned quickly after 1938 From that year onward nearly every major new economic law passed by Congress showed the mark of corporate dominance Domhoff accessibly portrays documents of the Committee s vital influence in the halls of government supported by his interviews with several of its key employees and trustees Domhoff concludes that in terms of economic influence liberalism was on a long steady decline despite two decades of post war growing equality and that ironically it was the successes of the civil rights feminist environmental and gay lesbian movements not a new corporate mobilisation that led to the final defeat of the liberal labour alliance after 1968
