AI Aesthetics Jan-Noël Thon, Lukas R.A. Wilde, 2025-09-09 This volume investigates the intersection of generative AI and media aesthetics from an interdisciplinary perspective Combining in depth theoretical reflection with a diverse selection of case studies its authors explore the aesthetic forms of AI generated medial objects as well as the cultural imaginaries that the latter draw upon Bringing together a group of scholars from various geographic and disciplinary backgrounds the chapters move within and across different conceptualizations of AI aesthetics that can be located in between an aesthetics as artistics that is primarily concerned with aesthetic judgments related to skill and connoisseurship and an aesthetics as aisthetics that identifies all kinds of embodied perception as its object The book thus reflects on both the theoretical and the methodological implications of AI aesthetics while also demonstrating that this is still very much an emerging research field and that no dominant conceptualization of AI aesthetics has yet emerged Considering its decidedly international and interdisciplinary scope AI Aesthetics AI Generated Images between Artistics and Aisthetics will appeal to scholars and students within media studies cultural studies literary studies philosophy art history visual culture studies digital humanities and critical AI studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Diffusions in Architecture: Artificial Intelligence and Image Generators Matias del Campo, 2024-02-07 DIFFUSIONS IN ARCHITECTURE A guide to diffusion models and their impact on design with insight on how this novel artificial intelligence technology may disrupt the industry Diffusions in Architecture Artificial Intelligence and Image Generators delves into the impact of Generative AI models and their effect on architecture design and aesthetics The book presents an in depth analysis of how these new technologies are revolutionizing the field of architecture and changing the way architects approach their work The architects presented in the book focus on the application of specific AI techniques and tools used in generative design such as Diffusion models Dall E2 Stable Diffusion

and MidJourney It discusses how these techniques can generate synthetic images that are both realistic and imaginative creating new possibilities for architectural design and aesthetics Twenty two leading designers and theorists offer their insights providing disciplinary depth by covering the full impact of these learning tools on architecture Computergrafik - Zur Geschichte und Produktionsästhetik synthetischer Bilder Carolin Scheler,2023-11-02 Es existieren zahlreiche Verfahren um digitale Bilder zu erzeugen Diese Vielfalt erschwert es allerdings digitale Fotografien KI oder CGI Bilder voneinander zu differenzieren Carolin Scheler legt am Beispiel der 3D Computergrafik einen grundlegend neuen Ansatz vor digitale Bilderzeugnisse sthetisch zu analysieren Ausgehend vom Produktionsprozess beschreibt sie die Computergrafik als eigenst ndiges Ausdrucksverfahren und arbeitet eine den computergenerierten Bildern inh rente ideologische Vorstellung von Realismus heraus Es wird deutlich In der computergrafischen Softwareentwicklung ist immer ein bestimmtes Weltgef hl eingeschrieben mit Auswirkungen auf das Verh ltnis von Bild und Wirklichkeit Making Art With Generative AI Tools Hai-Jew, Shalin,2024-04-01 In the dynamic realm of generative artificial Intelligence AI the fusion of human creativity and machine intelligence has created a vibrant ecosystem of collaborative artmaking However this transformative process brings forth a myriad of concerns ranging from ethical considerations and the need for originality to navigating the legal complexities surrounding intellectual property As more and more online communities appear around the use of AI to aid in the creation of images there arises a pressing need for a comprehensive guide that not only dissects the intricacies of artmaking with generative AI tools but also offers practical solutions to the evolving dilemmas faced by artists researchers and technologists Making Art With Generative AI Tools emerges as an exploration of the challenges posed by this intersection of human expression and artificial intelligence Artists engaging with generative AI find themselves grappling with issues of authenticity social toxicity and the commercial viability of their creations From avoiding stereotypical visuals to ensuring proper crediting the realm of generative AI is rife with these complexities Furthermore the blurred lines between human and machine authorship necessitate a deeper exploration of how these innovative tools impact creativity representation and the very fabric of the art world **Python Automation For Dummies** Alan Simpson,2025-12-16 Streamline Your Workflow and Boost Productivity with Python Automation In today s workplaces there s a high demand for know how on the Python programming language especially for writing time saving scripts that can simplify routine work tasks Python Automation For Dummies delivers with simple explanations of how you can use Python to automatically wrangle data files manage media files create shortcuts find and organize web data and even analyze social media for trends With this easy to follow Dummies guide you can upskill expand your productivity and speed up the process of generating data driven insights You ll even learn to enhance your Python automations with AI for workflows that are faster and smarter Review the basics of Python coding and follow steps for automating all sorts of tasks Manage large file sets organize and analyze data and speed up research processes Automate scheduling and other time consuming tasks and optimize work with AI Free up

Artificial Intelligence, Design Law and Fashion Hasan Kadir Yilmaztekin, 2022-12-30 Artificial intelligence AI now infiltrates our culture After a couple of difficult winters AI today is a word on everybody's lips and it attracts everyone's attention regardless of whether they are experts or not From Apple's Siri to Amazon's Alexa Tesla's auto driving cars to facial recognition systems in CCTV cameras Netflix's film offering services to Google's search engine we live in a world of AI goods The advent of AI powered technologies increasingly affects people's lives across the globe As a tool for productivity and cost efficiency AI also shapes our economy and welfare AI generated designs and works are becoming more popular Today AI technologies can generate several intellectual creations Fashion is one of the industries that AI can profoundly impact AI tools and devices are currently being used in the fashion industry to create fashion models fabric and jewellery designs and clothing When we talk about AI generated designs we instead focus on the fruits of innovation more best selling apparels more fashionable designs and more fulfilment of customer expectations without paying heed to who the designer is Designers invest a lot of talent time and finances into designing and creating each article of clothing and accessory before they release their work to the public Pattern drafting is the first and most important step in dressmaking Designers typically start with a general sketch on paper add styles elements and colours revise and refine everything and finally deliver their design to dressmakers AI accelerates this time consuming and labour intensive process Yet the full legal consequences of AI in fashion industry are often forgotten An AI device's ability to generate fashion designs raises the question of who will own intellectual property rights over the fashion designs Will it be the fashion designer who hires or contracts with the AI programmer Will it be the programmer Will it be the AI itself Or will it be a joint work of humans and computers And who will be liable for infringement deriving from use of third party material in AI generated fashion designs This book explores answers to these questions within the framework of EU design and copyright laws It also crafts a solution proposal based on a three step test and model norms which could be used to unleash the authors rights holders and infringers around AI generated fashion designs

Artificial Intelligence (AI) in Social Research Prokopis A. Christou, 2025-04-08 The field of social research is characterized by its broad scope and interdisciplinary nature encompassing the examination of human behaviour societies and various facets of social existence however it is influenced by numerous factors including technological advancements It is therefore no surprise that Artificial Intelligence AI has rapidly become a driving force bringing about substantial transformations within the field The use of AI assisted tools and programmes for the collection analysis and interpretation of both quantitative and qualitative data is increasing at a remarkable pace The implications of utilizing these applications are significant and noteworthy While these technologies present numerous opportunities it is important to acknowledge the accompanying dilemmas and risks associated with this form of technological advancement With a focus on AI's research

implications this book explores various considerations and examples across different disciplines of social research
