book first discusses how BuildIt works and how it is used to build models Examples range from the simple to progressively more complex mathematical models Ultimately readers are taught how to build a generic crop growth model from its five core components meteorology canopy photosynthesis energy balance soil water and crop growth development Ultimately agriculturists will be able to build their own mathematical models in Excel and concentrate more on the science and mathematics of their modeling work rather than being distracted by the intricacies of computer programming InfoWorld,1986-05-12 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **InfoWorld**,1993-08-23 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Intermediate Perl** Randal L.
