Cyber Monday Science Experiments Compare:

Web Resources for Science Activities Amy Gammill, 2004-01-05 *Social Science Experiments* Donald P.

Green, 2022-09-14 This book is designed for an undergraduate one semester course in experimental research primarily targeting programs in sociology political science environmental studies psychology and communications Aimed at those with limited technical background this introduction to social science experiments takes a practical hands on approach After explaining key features of experimental designs Green takes students through exercises designed to build appreciation for the nuances of design implementation analysis and interpretation Using applications and statistical examples from many social science fields the textbook illustrates the breadth of what may be learned through experimental inquiry A chapter devoted to research ethics introduces broader ethical considerations including research transparency The culminating chapter prepares readers for their own social science experiments offering examples of studies that can be conducted ethically inexpensively and quickly Replication datasets and R code for all examples and exercises are available online

Digital Entrepreneurship Jonathan Allen, 2019-02-11 Technology has enabled a new age of entrepreneurship as entrepreneurs find digital tools that enable new ventures to exploit commercial opportunities around the world This textbook provides students with expert guidance on using technology platforms to start new ventures With an award winning approach the author guides readers through the process of a lean startup taking a digital first approach to entrepreneurship Students using the book will emerge with enhanced understanding of different digital business models analytical skills for digital ventures and the confidence to move from prototype to product Online resources such as slides a sample syllabus and exercises encourage the classroom to become an interactive and dynamic space To access these resources please visit <https://www.learn.digitalentrepreneurship.com>

Online by Choice Stephanie L. Moore, Michael K. Barbour, 2023-11-14 Online learning should and must be part of the educational portfolio Online instruction has become an easy target to blame for learning loss during the pandemic But in fact it is a rich resource that can strengthen current classroom teaching and also prepare schools to weather future school closings In *Online By Choice* Stephanie Moore and Michael Barbour argue persuasively that online learning is a precious source of resilience and flexibility for schools now and going forward an important feature of a robust ecosystem along with face to face and blended instruction and that failing to incorporate online is strategically impoverished Choosing online instruction is very different from rushing to remote learning in an emergency manner however and doing it well involves a myriad of decisions These authors provide essential guidance and tools for teachers and school leaders as they select design and implement online education solutions including the handshakes needed to align instructional needs with school or district level infrastructure and supports

Advances in Intelligent Systems and Digital Applications Noreddine Gherabi, Janusz Kacprzyk, Sara Arezki, 2025-08-12 This book serves as a comprehensive reference providing cutting edge knowledge on intelligent systems and digital applications It covers theoretical foundations

and significant issues in machine learning deep learning and data analytics Each chapter concludes with a detailed bibliography for further in depth reading Divided into two sections Foundations and Applications the book offers a complete source of information on its theme The chapters include concepts algorithms figures graphs and tables to enhance readability The target audience includes researchers practitioners and postgraduate and graduate students developing or utilizing artificial intelligence algorithms in various applications

Handbook of Research on Applied E-Learning in Engineering and Architecture Education Fonseca, David, Redondo, Ernest, 2015-12-29 The integration of technology in education has provided tremendous opportunity for learners of all ages In today's technology focused society the traditional classroom setting is being transformed through online learning platforms collaborative and experimental methods and digital educational resources that go hand in hand with non digital learning devices The Handbook of Research on Applied E-Learning in Engineering and Architecture Education reviews the latest research available on the implementation of digital tools and platforms within the framework of technical education specifically in the subjects of architecture and engineering Taking a global approach to the topic of online learning environments for technical education at all grade levels this comprehensive reference work is ideally designed for use by educators instructional designers and researchers from around the world This handbook contains pertinent research on a variety of educational topics including online learning platforms mobile and blended learning collaborative learning environments gaming in education informal learning and educational assessment
