Lennox, 2024-11-26 Will technology change what it means to be human You don t have to be a computer scientist to have discerning conversations about artificial intelligence and technology We all wonder where we re headed Even now technological innovations and machine learning have a daily impact on our lives and many of us see good reasons to dread the future Are we doomed to the surveillance society imagined in George Orwell s 1984 Mathematician and philosopher John Lennox believes that there are credible responses to the daunting questions that AI poses and he shows that Christianity has some very serious sensible evidence based things to say about the nature of our quest for superintelligence This newly updated and expanded edition of 2084 will introduce you to a kaleidoscope of ideas Key recent developments in technological enhancement bioengineering and in particular artificial intelligence Consideration of the nature of AI systems with insights from neuroscience The way AI is changing how we communicate implications for medicine manufacturing and the military its use in advertising and automobiles and education and the future of work How data is used today for surveillance thought control The rise of virtual reality and the metaverse The transhumanist agenda and longtermism The agreements and disagreements that scientists and experts have about the future of AI The urgent need for regulation and control in light of the development of large language transformers like CHATGPT Key insights from Scripture about the nature of human beings the soul our moral sense our future and what separates us from machines In straight forward accessible language you will get a better understanding of the current capacity of AI its potential benefits and dangers the facts and the fiction as well as possible future implications Since the questions posed by AI daunting as they might be affect most of us they demand answers 2084 and the AI Revolution Updated and Expanded Edition has been written to challenge and ignite the curiosity of all readers Whatever your worldview Lennox provides clear information and credible answers that will bring you real hope for the future of humanity **Road to a More Intelligent World** Pengfei Sun, 2025-05-31 This book provides an in depth look at the current development of the fifth generation mobile communication technology 5G and artificial intelligence AI their technological advantages application and critical role in science and technology as well as their future development trends This book is divided into three parts The first part details the current development of 5G around the globe and the evolution from 5G to 5 5G The second part explores the significant developments in AI technologies including typical AI technologies such as machine learning ML natural language processing NLP and computer vision CV and the popular foundation model technologies The third part looks at the impacts of 5G AI on the digitalization and intelligent development of industries and showcases some of the applications in government meteorology education and healthcare etc This book can serve as a reference for a diverse range of readers such as people in

the public sector and the mobile communications industry and faculty and students in this field The Men Who Killed the News Eric Beecher,2024-07-31 Readings Best Books of 2024 Non Fiction Nominated for the 2025 Sperber Prize Never before has the media played such an active part in our politics with Elon Musk using X to affect world elections and direct US government policy But as Crikey owner and ex News Corp executive Eric Beecher shows media moguls have a long history of abusing their power What s gone wrong with our media The answer its owners From William Randolph Hearst to Elon Musk from the British press barons to colonial upstarts Conrad Black and Rupert Murdoch media proprietors have manipulated the news to accumulate wealth and influence as they meddled with democracy Eric Beecher knows the news business from bottom to top He has been a journalist editor and media proprietor of Text Media and Crikey with the rare distinction of having both worked for and been sued unsuccessfully by the Murdochs This book reveals the distorted role of the media moguls of the past two centuries their techniques strategies behind closed doors machinations and indulgent lifestyles It explains how they have exploited the shield of the freedom of the press to undermine journalism and truth In an era of fake news AI and misinformation this is democracy s chillingly important story how a small coterie of flawed and narcissistic moguls created a shadow of power that has contributed to making the media an agent of mistrust The Economic Impact of Fiscal Policy Uncertainty: Evidence from a New Cross-Country Database Mr. Gee Hee Hong,Shikun (Barry) Ke,Anh D. M. Nguyen,2024-09-27 Fiscal policy uncertainty FPU ambiguity in government spending and tax plans as well as in public debt valuation is widely regarded as a source of economic and financial disruptions However assessing its impact has so far been limited to a few large economies In this paper we construct a novel database of news based fiscal policy uncertainty for 189 countries Importantly we track fiscal uncertainty events that generate global attention that we refer to as the global fiscal policy uncertainty This uncertainty has contractionary effects reducing industrial production in both advanced and emerging market economies with impacts greater than country specific fiscal policy uncertainty Additionally global fiscal policy uncertainty raises sovereign borrowing costs and generates synchronous movements in the global financial variables even after accounting for US monetary policy shocks **Four Battlegrounds** Paul Scharre,2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club s Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of *Burn In* An award winning defense expert tells the story of today s great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future *Four Battlegrounds* argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing

power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre's account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China's National Team of leading AI companies to show the chilling synergy between China's government private sector and surveillance state He interviews Pentagon leadership and tours U.S. Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order
