Conceptual Foundations of Quantum Field Theory

Tian Yu Cao,2004-03-25 Multi author volume on the history and philosophy of physics *The Research System in Transition* Susan E. Cozzens,Peter Healey,Arie Rip,John Ziman,2012-12-06 On a mountainside in sunny Tuscany in October 1989 96 people from 23 countries on five continents gathered to learn and teach about the problems of managing contemporary science The diversity of economic and political systems represented in the group was matched by our occupations which stretched from science policy practitioners through research scientists and engineers through academic observers of science and science policy It was this diversity along with the opportunities for informal discussion provided by long meals and remote location that made the conference a special learning experience Except at lecture time it was impossible to distinguish the students at this event from the teachers and even the most senior members of the teaching staff went away with a sense that they had learned more from this group than from many a standard conference on science policy they had attended The flavor of the conference experience cannot be captured adequately in a proceedings volume and so we have not tried to create a historical record in this book Instead we have attempted to illustrate the core problems the participants at the conference shared discussed and debated using both lectures delivered by the formal teaching staff and summaries of panel discussions which extended to other participants and therefore increased the range of experiences reported
