either of them imagined a political crime syndicate with ties that reach deep into city hall Every lead is a trap every ally a potential traitor And the deeper Elena digs the clearer it becomes that Marcus isn't telling her everything His connection to the syndicate runs dangerously close to home and trusting him might be her biggest mistake When the line between protector and suspect begins to blur Elena must decide how much of her heart and her life she's willing to risk in pursuit of the truth Because in a city built on secrets justice has a price and loving the wrong man could cost her everything Broken Trust is a pulse pounding romantic thriller about loyalty betrayal and the dangerous chemistry between two people forced to choose between saving each other and saving themselves **This Machine Kills Secrets** Andy Greenberg,2012-09-13

Young men and women who grew up in the digital age are expressing their dissatisfaction with governments the military and corporations in a radically new way They are building machines writing cryptographic software codes that are designed to protect the individual in a cloak of anonymity while institutional secrets are uploaded for public consumption This movement is shining a light on governments classified documents and exposing abuses of power like never before From Australia to Iceland organisations like Wikileaks Openleaks and Anonymous are just some of the more familiar groups that are enabling whistleblowers and transforming the next generation's notion of what activism can be The revolution won't be televised It'll be online Andy Greenberg technology writer for Forbes magazine has interviewed all the major players in this new era of activism including Julian Assange and blows the cover of a key activist previously only presumed to exist named The Architect who accomplished for at least two leak sites exactly what his name implies In **This Machine Kills Secrets** Greenberg offers a vision of a world in which institutional secrecy no longer protects those in power from big banks to dysfunctional governments A world that digital technology has made all but inevitable **The Digital Public Square** Jason

The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder, whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future? Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in and what we decide now will shape the rest of the century. Our choices allow technology to enrich the few and impoverish the many or harness it and distribute its benefits. *The Age of Surveillance Capitalism* is a deeply reasoned examination of the threat of unprecedented power free from democratic oversight. As it explores this new capitalism's impact on society, politics, business, and technology, it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization. Most critically, it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves.
