The Good Book on Leadership John Borek, Danny

Lovett, Elmer L. Towns, 2005 Biblical personalities examined include Abraham Jacob Joseph Moses Joshua Samson Saul David Solomon Ezra Nehemiah Jesus Peter Paul and many others **Army**, 1982 **George C. Marshall and the Early Cold War** William A. Taylor, 2020-07-09 Though best known for his central part in the American war effort from 1939 to 1945 George C Marshall's critical role in the early Cold War was probably at least as important in shaping the policies and politics of the postwar western world and in cementing his place as a pivotal figure in twentieth century American history This book places Marshall squarely at the center of the story of the American century by examining his tenure in key policymaking positions during this period including army chief of staff special presidential envoy to China secretary of state and secretary of defense among others George C Marshall and the Early Cold War brings together a diverse and accomplished group of scholars including military diplomatic and institutional historians to explore how Marshall Time magazine's Man of the Year in both 1943 and 1947 and the 1953 Nobel Peace Prize winner molded debates on all the major issues of his day such as universal military training China's civil war an independent air force the National Security Act of 1947 nuclear weapons European Recovery Program North Atlantic Treaty Korean War and racial integration of the U S military With a focus on Marshall's public service at the intersection of American policy politics and society the authors provide a comprehensive historical account of his central role in shaping America during a tumultuous yet formative period in the nation's history Their work fills a void in the scholarship of American military history and American history generally providing context for the consideration of broader questions about American power and the place of the military within American society

Anatomy of Victory John D. Caldwell, 2018-11-09 This groundbreaking book provides the first systematic comparison of America's modern wars and why they were won or lost John D Caldwell uses the World War II victory as the historical benchmark for evaluating the success and failure of later conflicts Unlike WWII the Korean Vietnam and Iraqi Wars were limited but they required enormous national commitments produced no lasting victories and generated bitter political controversies Caldwell comprehensively examines these four wars through the lens of a strategic architecture to explain how and why their outcomes were so dramatically different He defines a strategic architecture as an interlinked set of continually evolving policies strategies and operations by which combatant states work toward a desired end Policy defines the high level goals a nation seeks to achieve once it initiates a conflict or finds itself drawn into one Policy makers direct a broad course of action and strive to control the initiative When they make decisions they have to respond to unforeseen conditions to guide and determine future decisions Effective leaders are skilled at organizing constituencies they need to succeed and communicating to them convincingly Strategy means employing whatever resources are available to achieve policy goals in situations that are dynamic as conflicts change quickly over time Operations are the actions that occur when politicians soldiers and diplomats execute plans A strategic architecture Caldwell argues is thus not a static blueprint but a dynamic vision of how a state can succeed or fail in a conflict **The Generals** Thomas E. Ricks, 2012-10-30 A New York Times
