capture the contours of an emerging new era where old perspectives lead us astray and the old policy toolbox is hopelessly inadequate This is true for the idea that the best or only way to promote innovation is to transform knowledge into private property It is also true for anti trust policies focusing exclusively on consumer prices The formation of global infrastructures that lead to natural monopolies calls for public rather than private ownership Scholars and professionals from the social sciences and humanities in particular economics sociology political science geography educational science and science and technology studies will enjoy a clear and all embracing depiction of innovation dynamics in contemporary capitalism with a particular focus on asymmetries between actors regions and topics In fact its topical issue broadens the book s scope to those curious about how innovation networks shape our world Introduction, glossary, and indexes Geoffrey Chaucer,1894
