Vowel Length From Latin to Romance Michele Loporcaro, 2015-07-31 This book investigates the changes that affected vowel length during the development of Latin into the Romance languages and dialects In Latin vowel length was contrastive e.g. pila ball vs. pila pile like English bit vs. beat but no modern Romance language has retained that same contrast However many non standard Romance dialects as well as French up to the early 20th century have developed novel vowel length contrasts which are investigated in detail here Unlike previous studies of this phenomenon this book combines detailed historical evidence spanning three millennia as attested by extant texts with extensive data from present day Romance varieties collected from first hand fieldwork which are subjected to both phonological and experimental phonetic analysis Professor Loporcaro puts forward a detailed account of the loss of contrastive vowel length in late Latin showing that this happened through the establishment of a process which lengthened all stressed vowels in open syllables as in modern Italian casa ka sa His analysis has implications for many of the most widely debated issues relating to the origin of novel vowel length contrasts in Romance which are also shown to have been preserved to different degrees in different areas The detailed investigation of the rise and fall of vowel length in dozens of lesser known non standard varieties is crucial in

understanding the development of this aspect of Romance historical phonology and will be of interest not only to researchers and students in comparative Romance linguistics but also more generally to phonologists and those interested in historical linguistics beyond the Latin Romance language family

The Green Middle Ages

Claudine Chavannes-Mazel, Linda Ijpelaar, 2025-10-01 How green were people in late antiquity and the Middle Ages Unlike today the nature around them was approached with faith trust and care The population size was many times smaller than today and human impact on nature not as extreme as it is now People did not have to worry about issues like deforestation and sustainability This book is about the knowledge of plants and where that knowledge came from How did people use earth and plants in ancient times and what did they know about their nutritional or medicinal properties From which plants one could make dyes such as indigo woad and dyer s madder Is it possible to determine that through technical research today Which plants could be found in a ninth century monastery garden and what is the symbolic significance of plants in secular and religious literature The Green Middle Ages addresses these and other issues including the earliest herbarium collections with a leading role for the palaeography and beautiful illuminations from numerous medieval manuscripts kept in Dutch and other Western libraries and museums

Gender from Latin to Romance Michele Loporcaro, 2017-12-01 This book explores grammatical gender in the Romance languages and dialects and its evolution from Latin Michele Loporcaro investigates the significant diversity found in the Romance varieties in this regard he draws on data from the Middle Ages to the present from all the Romance languages and dialects discussing examples from Romanian to Portuguese and crucially also focusing on less widely studied varieties such as Sursilvan Neapolitan and Asturian The investigation first reveals that several varieties display more complex systems than the binary masculine feminine contrast familiar from modern French or Italian Moreover it emerges that traditional accounts whereby neuter gender was lost in the spoken Latin of the late Empire cannot be correct instead the neuter gender underwent a range of different transformations from Late Latin onwards which are responsible for the different systems that can be observed today across the Romance languages The volume provides a detailed description of many of these systems which in turns reveals a wealth of fascinating data such as varieties where husbands are feminine and others where wives are masculine dialects in which nouns overtly mark gender but only in certain

syntactic contexts and one Romance variety Asturian in which it appears that grammatical gender has split into two concurrent systems The volume will appeal to linguists from a range of backgrounds including Romance linguistics historical linguistics typology and morphosyntax and is also of relevance to those working in sociology gender studies and psychology
