First published in 1995, this volume uncovered a wealth of low cost good quality material for use in the classroom. Author David Brown has been teaching in primary, middle and secondary schools for 23 years. It was through David's need to resource topics that he uncovered this material. Goldmine places these resources into topic areas, describes them and tells you where you can get them from. Since the first edition in 1985, Goldmine has developed into the country's leading directory of free and sponsored teaching resources, providing the wherewithal to obtain over 6000 resources from some 235 suppliers. Budget conscious schools will find it saves its purchase price many times over and parents and teachers are safe in the knowledge that all the items described in here are personally recommended by a teacher, the compiler himself. *Official Gazette of the United States Patent and Trademark Office*, 2004 Motor Freight Transportation and Warehousing Survey, 1993 **Commerce Business Daily**, 1997-12-31 *IMDG Code* International Maritime Organization, 2008

The IMDG Code was first published

in 1965 and has become the standard international code for the transport of dangerous goods and marine pollutants by sea. The new edition includes the changes in Amendment 34/08 adopted by the Maritime Safety Committee MSC in May 2008. Although the information in the Code is directed primarily at the mariner, its provisions are essential for a whole range of industries and services. Manufacturers, packers, shippers, feeder services such as road and rail and port authorities will find reliable advice on terminology, packing, labelling, classification, stowage, segregation and emergency response action. The new amendments to the Code are mandatory as from 1 January 2010 but may be applied by Administrations voluntarily from 1 January 2009. The many detailed changes introduced by Amendment 34/08 include in the Dangerous Goods List there are 12 new UN numbers going up to 3481 with explosives going up to 0508 there are also 5 UN numbers which were previously not listed in the IMDG Code because they were not regulated under it. Appropriate training for shore side staff involved with dangerous goods is now mandatory instead of just recommended and may be audited by the competent authority. Persons not yet trained may only operate under the direct supervision of a trained person and additional changes concerning marine pollutants, IMO tank instructions, excepted quantities, limited quantities and radioactive materials of class 7.
