NOVA WEIGH

Best in class

The 350 and 355 digital indicators provide all the weighing performance required in modern manufacturing plants. A choice of hardware and firmware options allows it to be cost-effectively tailored to each user's exact needs.

Applications

The versatility of the 350 and 355 makes them equally suitable for a stand-alone weigh scale, dosing and filling, or check-weighing system, or for integration with a PLC or computer based control system.

Options for the 350 of zinc die-cast and 304 stainless steel enclosures means that the 350 is equally at home in a control panel or field-mounted in the hose-down areas of a food plant.

Calibration and setting up

The 350 and 355 are quick and easy to set-up and calibrate. With their display and key pad alone, the user can calibrate and configure the instrument for a wide range of weighing tasks.

Digital inputs and outputs

A plug-in module provides three outputs which can be configured to perform a number of functions including check-weighing, single ingredient fill (355) with two-speed and auto-in-flight, discharge and fill and discharge. Setpoints can respond to net or gross weight and rising or falling values.

One digital input is fitted and this can be configured as a Print, Tare or Zero function.

System integration

A single RS232 (optional RS485) communication port can be connected, for example, to a printer, or remote display. The data format and content are set using one of the ten built-in formats or with the 'customer transmit table' feature.

A plug-in module provides a 0 - 10 V or 0/4 - 20 mA output which can be set to track net or gross weight.
