NRP 8th Edition Arrives in June 2021

The NRP 8th edition brings a new curriculum that offers two levels of NRP providers, two suggested Provider course formats, and several significant practice changes that were made for educational efficiency and patient safety.

We are happy to announce that Neonatal Resuscitation Program (NRP) 8th edition materials will be available for use on June 1, 2021. The NRP 8th edition materials must be in use by January 1, 2022.

On October 21, 2020, the American Academy of Pediatrics (AAP) and the American Heart Association (AHA) released 2020 revised guidelines for neonatal resuscitation (<https://pediatrics.aappublications.org/content/pediatrics/early/2020/10/19/peds.2020-038505E.full.pdf>). The guidelines for neonatal resuscitation were written by members of the AHA, the NRP Steering Committee, and other resuscitation experts, and are used to create the educational materials for NRP 8th edition.

The NRP 8th edition algorithm (Figure 1) is a variation of the algorithm that was published in the AAP/AHA revised guidelines for neonatal resuscitation. The NRP 8th edition algorithm differs in style and word choice for educational efficiency, but it does not conflict with the published science.

NRP 8th edition introduces NRP Essentials and NRP Advanced

NRP 8th edition introduces a new educational methodology tailored to better meet the needs of the many health care professionals who manage the newly born baby. The NRP

Steering Committee made the decision to offer 2 course options so that NRP providers could excel in the course material most relevant to their role and personnel resources during newborn resuscitation.

The NRP Essentials participant will be responsible for the material in Lessons 1 through 4 only.

1. Foundations of Neonatal Resuscitation
2. Anticipating and Preparing for Resuscitation
3. Initial Steps of Newborn Care
4. Positive-Pressure Ventilation (includes Laryngeal Mask and Orogastric Tube)

The NRP Essentials learner may study additional lessons for knowledge enhancement (Lessons 5 through 11 and Supplemental Lessons) but will not be tested on that material.

The NRP Advanced participant will be responsible for the material in Lessons 1 through 4 and Lessons 5 through 11;

5. Endotracheal Intubation
6. Chest Compressions
7. Medications
8. Resuscitation and Stabilization of Babies Born Preterm

Nrp Sixth Edition Course Manual:

Neonatal Airway Management Lindsay C. Johnston, Taylor Sawyer, 2025-01-24 Intubation is one of the most performed procedures in neonatal medicine. The field of neonatal airway management has been transformed by many notable developments over the past 5-10 years. Most importantly, the use of pre-medication, video laryngoscopy, and laryngeal masks have been the subject of numerous recent clinical investigations and academic publications. Despite ongoing research, neonatal airway management continues to carry a high risk of complications and both short and long-term morbidities. A comprehensive book on neonatal airway management has never been published. Hence, the proposed book fills an important niche in the healthcare literature. This book provides a comprehensive state-of-the-art review of neonatal airway management and serves as a valuable resource for clinicians, educators, and researchers involved in neonatal care. The book reviews patient, practice, provider, and system factors important in neonatal airway management. Chapters explore key topic areas including airway management techniques, training, competency assessment, premedication, video laryngoscopy, laryngeal mask airway, and others. Written by experts in the field and including the most up-to-date scientific and clinical information, *Neonatal Airway Management* serves as a useful resource for physicians and researchers dealing with and interested in neonatal airway management. It provides a concise yet comprehensive summary of the current state of the field that helps guide patient management and stimulates investigative efforts.

Comprehensive Neonatal Nursing Care, Sixth Edition

Carole Kenner, Leslie Altimier, Marina V. Boykova, 2019-08-28 Praise for the Fifth Edition: This book provides a complete look at neonatal healthcare delivery. It includes discussions of contemporary topics of interest such as informatics, genetics, global health, and family-centered care, which are vital to providers caring for neonates today. The case studies and evidence-based practice dialogues provide great opportunities for further reflection. The book is useful to a wide audience in nursing, including undergraduate and graduate nursing students, practicing neonatal and pediatric nurses, and advanced practice nurses who care for neonates. Score: 92/4 Stars Doody's Medical Reviews. The sixth edition of this acclaimed neonatal nursing text is completely updated to encompass the most current research findings and strategies for providing cost-effective and evidence-based care. It continues to address neonatal care from a physiologic and pathophysiologic perspective with a major emphasis on nursing management at the bedside and advanced practice level. It examines each neonatal body system and describes evidence-based interventions that assist in understanding the why behind various clinical presentations. Integrative management is threaded throughout the text along with extensive research findings to support practice strategies and rationales for sound clinical decision-making. Case studies, evidence-based practice boxes, QSEN competencies, and online resources help to amplify and reinforce content. New to the Sixth Edition: New technologies including neonatal health care simulation, Trauma-Informed Care, Substantial revisions to the Neonatal Resuscitation Program, Updates in Continuous Quality Improvement, Emphasis on neuroprotective factors, Emerging global trends, Genomics and its relationship to precision
