SAP is a great software One needs to fully understand its features in order to effectively exploit them for the benefit of customers Mr Agrawal s books on SAP HR have a unique approach A chapter usually focuses on a single business concept and discusses the user interface as well as its associated configuration This logical division makes it easier for readers to understand the functionality Another important feature of these books is the level of detail Each screen and each field in a screen is explained Explanation includes meaning use case and in some cases guidelines Details are balanced by overviews explaining the concepts and their relationships While explaining functionality Mr Agrawal has taken efforts to highlight what can be done and how it is to be done This is particularly important for less experienced users and

consultants Indicating chapter numbers against each menu and configuration item is a very useful innovation as it establishes direct link between the SAP system and the book Another useful feature is that these books can be read not only by consultants but also by users business process owners and even by senior managers The importance of each topic for each category of users is specified Mr Agrawal has taken considerable pain in writing these books and I congratulate Mr Agrawal on his achievement and thank him for his contribution to the SAP community K Sanjai Regional Head Asia Pacific Japan SAP Global Delivery
