

7-3a October 9, 20--

No. 1 The first payroll in October covered the two workweeks that ended on September 26 and October 3. This payroll transaction has been entered for you in the payroll register, the employees' earnings records, the general journal, and the general ledger. By reviewing the calculations of the wages and deductions in the payroll register and the posting of the information to the employees' earnings records, you can see the procedure to be followed each payday.

Wages and salaries are paid by issuing special payroll checks. When the bank on which they are drawn receives such checks, they will be charged against the payroll cash account.

Observe the following rules in computing earnings each pay period:

1. Do not make any deduction from an employee's earnings if the employee loses less than 15 minutes of time in any day. Time lost that exceeds 15 minutes is rounded to the nearest quarter-hour and deducted. If the time lost by an employee is not to be deducted, the time clerk will make a notation to that effect on the Time Clerk's Report.
2. In completing the time record columns of the payroll register for all workers, you should place an 8 in the day column for each full day worked (refer to page PR-2 at the end of the book). If an employee works less than a full day, show the actual hours for which the employee will be paid.
3. In the case of an employee who begins work during a pay period, compute the earnings by paying the employees their weekly rate for *any full week* worked. For any *partial week*, compute the earnings for that week by multiplying the hours worked by the hourly rate of pay.
4. If time lost is to be deducted from a salaried employee's pay, the employee's pay must be determined by multiplying the actual hours worked for that week by the hourly rate. If hours are missed but no pay is deducted, include those hours in the Time Record columns on the payroll register. The following schedule shows the weekly and hourly wage rates of the salaried employees:

Employee	Weekly Rate	Hourly Rate
Ferguson, Jamie H.	\$1,125.00	\$28.13
Ford, Catherine L.	610.00	15.25
Mann, Kari C.	675.00	16.88
O'Neill, Joseph T.	2,307.69 ★	28.85
Russell, Serdar P.	600.00	15.00
Sokowski, Thomas J.	1,025.00	25.63
Williams, Ruth V.	611.54	15.29

5. Plant workers (*Bonno and Ryan*), other than supervisors, are employed on an hourly basis. Compute the wages by multiplying the number of hours worked during the pay period by the employee's

Ecosystem Services from Agriculture and Agroforestry Bruno Rapidel,Fabrice DeClerck,Jean Francois Le Coq,John Beer,2012-06-25 Agricultural systems are no longer evaluated solely on the basis of the food they provide but also on their capacity to limit impacts on the environment such as soil conservation water quality and biodiversity conservation as well as their contribution to mitigating and adapting to climate change In order to cope with these multiple service functions they must internalize the costs and benefits of their environmental impact Payments for ecosystem services are hoped to encourage and promote sustainable practices via financial incentives The authors show that while the principle is straightforward the practice is much more complicated Whereas scenic beauty and protection of water sources provide benefits to the local population carbon sequestration and biodiversity conservation can be considered international public goods rendering potential payment schemes more complex Few examples exist where national or international bodies have been able to set up viable mechanisms that compensate agricultural systems for the environmental services they provide However this book provides several examples of successful programs and aims to transfer them to other regions of the world The authors show that a

product can be sold if it is clearly quantified there exists a means to determine the service s values and there is a willing buyer The first two sections of the book present methodological issues related to the quantification and marketing of ecosystem services from agriculture including agroforestry The third and final section presents case studies of practical payments for ecosystem services and experiences in Central and South America and draws some lessons learnt for effective and sustainable development of ecosystem services compensation mechanisms Federal Register ,1978-04 Your Federal Income Tax for Individuals , **Apps and Services with .NET 8** Mark J.
