

Modify Zoo Terrain

Animals are happy when their exhibit matches their natural habitat. You can change the exhibit's surface or elevation by clicking the **Construction** button, and then clicking either the **Terrain Type** or **Terrain Height** tab.

Terrain Type Tab

Choose this tab to convert the existing surface type into the kind the animal prefers. (See page 15 to learn how to determine what the animal likes.)

To change the terrain type

1. At the top of the **Terrain Type** panel, change the size of your tool by clicking the **Increase Tool Size (+)** button to increase its size or the **Decrease Tool Size (-)** button to decrease its size.

Terrain is changed by applying a terrain tool to the landscape of your zoo.

2. Click the type of terrain you want to use.

3. Place the cursor over the area you want to change, and then click and drag the cursor to modify the terrain.

4. Click the **Accept Terrain Changes** button to make the change permanent, or click the **Undo Terrain Changes** button to start over.

As you convert terrain, a cost appears in the lower portion of the **Terrain Type** panel. This is a running total, and you are not charged this amount until you click the **Accept Terrain Changes** button, deselect the terrain tool, switch to a new tab, or close the **Construction** panel.

Any muddy or unhappy animals may trample the terrain in their enclosure, and you will have to replace the terrain.
