About the Book

Hardware and Networking form the basic cores of the computer knowledge, not only for the users but also for the people who are there to take care of the computer system. They are the ones who would become Hardware Engineers.

Networking is another important aspect of the computer system. In fact, it forms the base for Internet. In this book various aspects of networking are covered. Starting from various types of networks to various types of topologies, it goes on to trace the Security, Architecture, Connectivity and Administration, etc. The book ends up with a chapter on Wireless Networking.
