Reverence in the Healing Process David A. Crenshaw, 2009-11-25 Reverence is defined as a sense of awe or profound respect for the person It has become increasingly rare in modern culture not only in health care but in education and in corporations where people are too often treated in a dehumanizing way This groundbreaking book is the most comprehensive volume to date that explores in depth the concept of reverence and strengths based approaches in the psychotherapy healing process as manifested in a wide variety of treatment modalities such as child and play therapy family therapy therapeutic assessments and in training programs Applications in head start programs and group homes with both juvenile offenders and traumatized children are covered in individual chapters along with using a strengths based reverent approach with providers

Transference and Countertransference from an Attachment Perspective Una McCluskey, Michael O'Toole, 2019-08-29 Locating the phenomenon of transference within an evolutionary perspective this important book develops a new form of dynamic therapy that focuses on the dynamics of attachment in adult life and will be of use to a range of mental health professionals and those at all levels in the caring and education professions

Transference and Countertransference from an Attachment Perspective A Guide for Professional Caregivers explores the ways in which transference phenomena can be located in the different aspects of the self that are instinctive goal corrected and interrelated At the centre of the book is the idea that when intrapersonal or interpersonal systems aspects of the self such as careseeking caregiving sharing interests sexuality self defence building a home get aroused the behaviour that follows is only logically and meaningfully connected when the system aspect of the self reaches its goal Placing this new theoretical and clinical approach within the psychoanalytic tradition the work of developmental psychologists and the field of neuroscience the book takes us to the heart of the clinical encounter and explores a range of issues including trauma the effect of early misattunements love and hate in the therapeutic relationship burnout in caregivers and the need for exploratory care for caregivers themselves Building on the therapeutic modality that emerged from the research described in McCluskey's *To Be Met as a Person* 2005 this book provides a valuable guide for psychologists psychotherapists medical practitioners nurses social workers organisational consultants educators coaches and workplace managers The McCluskey model for exploring the dynamics of attachment in adult life which underlies the work described in this book is currently being practised in a variety of settings and with different ages and communities These include end of life care organizations homelessness mental

health dementia care children adolescents and families schools pastoral work training of clinical psychologists and attachment based psychoanalytic psychotherapists occupational therapy art therapy private practice domestic violence police training GP support and consultation nurse training and support pain management clinics foster carers social workers couple relationships supervision of psychotherapists and counsellors therapeutic communities and complex grief and learning disabilities

Dog Bites: A Multidisciplinary Perspective Daniel Mills, Carri Westgarth, 2017-07-21 The issue of dog bites and dog aggression directed at humans is frequently in the media. However scientific research and evidence on the subject is scattered and sparse. Public and political opinions are often misinformed and out of proportion to the extent of the problem. Experts who have researched into the many facets involved in the subject have not so far pooled their knowledge together. *Dog Bites* aims to bring together expert knowledge of the current situation from a wide variety of disciplines to provide information to the many people and professions affected by the issue. Subjects range from the practical medical behavioural sociological and theoretical but the overall approach of the book is to be objective and integrative. Topics addressed include the genetic basis of aggression the public image of aggressive dogs bite statistics risk factors the forensics and surgical aspects of dog bites international legal perspectives court evidence first aid treatment zoonotic disease potential behavioural rehabilitation options risk to children and a consideration of why some dogs kill. All contributors are academic or long standing professional experts in their field and represent a wide spread of international expertise. The issue is an important one for pet owners vets animal shelters and anyone who works with dogs such as the police. This book is a valuable resource for them as well as for animal behaviourists academic researchers health professionals dog breeders and handlers. Please be advised that this book contains strong images of the subject matter that some readers may find distressing. 5m Books

Foundational Concepts in Neuroscience David E Presti, 2015-12-15 Key concepts in neuroscience presented for the non medical reader. A fresh take on contemporary brain science. The Neuroscience of Human Relationships 2e Louis Cozolino, 2014-03-25 A revised edition of the best selling text on how relationships build our brains. As human beings we cherish our individuality yet we know that we live in constant relationship to others and that other people play a significant part in regulating our emotional and social behavior. Although this interdependence is a reality of our existence we are just beginning to understand that we have evolved as social creatures with interwoven brains and biologies. The human brain itself is a social organ and to truly understand being human we must

understand not only how we as whole people exist with others but how our brains themselves exist in relationship to other brains The first edition of this book tackled these important questions of interpersonal neurobiology that the brain is a social organ built through experience using poignant case examples from the author s years of clinical experience Brain drawings and elegant explanations of social neuroscience wove together emerging findings from the research literature to bring neuroscience to the stories of our lives Since the publication of the first edition in 2006 the field of social neuroscience has grown at a mind numbing pace Technical advances now provide more windows into our inner neural universe and terms like attachment empathy compassion and mindfulness have begun to appear in the scientific literature Overall there has been a deepening appreciation for the essential interdependence of brain and mind More and more parents teachers and therapists are asking how brains develop grow connect learn and heal The new edition of this book organizes this cutting edge abundant research and presents its compelling insights reflecting a host of significant developments in social neuroscience Our understanding of mirror neurons and their significance to human relationships has continued to expand and deepen and is discussed here Additionally this edition reflects the gradual shift in focus from individual brain structures to functional neural systems an important and necessary step forward A great deal of neural overlap has been discovered in brain activation when we are thinking about others and ourselves This raises many questions including how we come to know others and whether the notion of an individual self is anything more than an evolutionary strategy to support our interconnection In short we are just beginning to see the larger implications of all neurological processes how the architecture of the brain can help us to better understand individuals and our relationships This book gives readers a deeper appreciation of how and why relationships have the power to reshape our brains throughout our life
