Mike Tovey,2016-04-22 Design Pedagogy explains why it is vital for design students that their education helps them
construct a passport to enter the professional sphere Recent research into design teaching has focused on its signature
pedagogies those elements which are particularly characteristic of the disciplines Typically based on core design theory
enlivened by approaches imported to the area such work has utility when it recognizes the visual language of designing the
media of representation used and the practical realities of tackling design questions Increasingly the 21st century sees these
activities in a global context where the international language of the visual artefact is recognized This book draws on recent
work in these areas It includes a number of chapters which are developed from work undertaken during the period of special
funding for centres of teaching excellence in the UK up until 2010 Two of those in design have provided the basis for
research and innovative developments reported on here They have helped to enliven the environment for design pedagogy
research in other establishments which are also included Design students need support for the agile navigation through the
design process Learning experiences should develop students natural motivations and professionalise motivation to create a
resilient informed and sustainable capacity This is the essence of transformative learning This collection explores how design
education is in itself a passport to practice and showcases how some of the key developments in education use techniques
related to collaboration case studies and experience to motivate students enable them to express their identity reflect and
