Becoming a Literacy Leader Jennifer Allen,2023-10-10 In this second edition of

Becoming a Literacy Leader Supporting Learning and Change author Jennifer Allen reflects on her work as a literacy specialist and how the role has evolved in the decade since she wrote the first edition. Her experiences can apply to all school leaders including principals, coaches, teachers, support staff, and office administrators. Allen focuses on three ideas to describe her work: Layered Leadership, the multitude of supports in place for teachers to encourage learning and change within schools; Shared experiences that develop community and develop common understanding of practices, curriculum, and assessment; Importance of rowing in the same direction in that literacy coaches and leaders stay interconnected and aligned to the goals of the school. Allen knows the challenges of teachers face and advocates literacy coaches implement these layers of support within a school including in-class support, curriculum support, and assessment study group facilitation and the cultivation of teacher leadership. In *Becoming a Literacy Leader*, she provides an explicit framework for implementing these layers of coaching and explains how administrators can use the literacy leader position to build and sustain change within their schools. This book will be the road map for how literacy leaders and coaches approach their work with purpose and intention. Online videos that accompany the book bring the text alive by showing readers what coaching looks and sounds like.

Assessment in Perspective Clare Landrigan, Tammy Mulligan, 2013. Assessment is an integral part of instruction. For the past decade, the focus on assessment, particularly via high-stakes mandated tests, has shifted away from the classroom and left teachers feeling like they are drowning in data. Assessment is and needs to be again much more than a number. *Assessment in Perspective* is about moving beyond the numbers and using assessment to find the stories they tell. This book helps teachers sort through the myriad of available assessments and use each to understand different facets of their readers. It discusses how to use a range of assessment types from reading conference notes and student work to running records and state tests together to uncover the strengths and weaknesses of a reader. The authors share a framework for thinking about the purpose, method, and types of different assessments. They also address the questions they ask when choosing or analyzing assessments: What type of tool do we need: diagnostic, formative, or summative; formal or informal; quantitative or qualitative? How do we use multiple assessments together to provide an in-depth picture of a reader? When and how are we giving the assessment? Do we want to be able to compare our readers to a standard score or do we need to diagnose a reader's needs? Which area of reading does this tool assess? How can we use the information from assessments to inform our instruction? What information does a particular assessment tell us and what doesn't it tell us? What additional information do we need about a reader to understand his or her learning needs? The book emphasizes the importance of triangulating data by using varied sources, both formal and informal, and across multiple intervals. It explains the power of looking at different types of assessments side by side with displays to find patterns or inconsistencies. What's more, students are included as valuable sources of data. Letting students in on the process of assessment is key to helping them set goals, monitor their own progress, and celebrate growth. When assessment is viewed in this way, instruction can meet high standards and still be developmentally appropriate.
