Starlight Starbright: Are Stars Conscious? Second Edition Greg Matloff, C Bangs, 2020-05-07 The only thing we can be absolutely sure of is our own consciousness But what is consciousness Is it a property that is unique to humans or do we share it with other lifeforms Or is the philosophical doctrine of panpsychism correct are stars and the entire universe conscious in some sense Early chapters in this book examine the prehistory mythology and history of this topic Arguments are presented from the viewpoints of shamans philosophers poets quantum physicists and novelists A simple toy model of panpsychism is then presented in which a universal field of proto consciousness interacts with molecular bonds via the vacuum fluctuation pressure of the Casimir Effect It is shown how this model is in congruence with an anomaly in stellar motions called Parenago's Discontinuity Cool redder less massive stars such as the Sun apparently circle the center of the galaxy faster than their hotter bluer more massive sisters This discontinuity occurs at the point in the stellar distribution where molecules begin to appear in stellar spectra As described in the first edition of this book observations of main sequence stars out to 260 light years and giant stars out to 1 000 light years using the ESA Hipparcos space observatory support the reality and non locality of Parenago's Discontinuity Local more conventional explanations for this phenomenon are not supported by observations of other galaxies and the spiral arms of the Milky Way Since 2014 the new ESA Gaia space observatory has been obtaining kinematics and

position data for 1 billion stars in our galaxy The first Gaia data release in 2016 has been used in 2018 by a Russian team to demonstrate Parenago's Discontinuity for a large stellar sample out to 500 light years from the Sun These observations support the hypothesis that anomalous stellar motion is due to stellar velocity as described by philosopher author Olaf Stapledon in his classic novel Star Maker as previously discussed by the author in the peer reviewed Journal of the British Interplanetary Society JBIS In light of the new Gaia observations and work by other researchers it is not impossible that panpsychism is emerging from the realm of philosophy as a new subdivision of observational astronomy Simple models of universal proto consciousness may be subject to inductive tests using current and future space observatories A special feature of this book is the chapter frontispiece art by C Bangs
