Now And Next Ten Frontiers For The Future Of Engagement:

CrowdRising Lorinda R. Rowledge, 2019-07-05 Open innovation enabled through crowdsourcing is one of the hottest topics in management strategy today. Particularly striking and of vital importance to the world are the pioneering efforts to apply crowdsourcing technology and open innovation to solve social, environmental, and economic sustainability challenges. *CrowdRising* sets out these challenges as context and then highlights the experiences of leaders and early adopters, identifies implementation guidelines, critical success factors, and lessons learned, and finally projects where the field is going in the future. With a strong focus on the applications of crowdsourcing for innovation, engagement, and market intelligence, the book profiles the initiatives of companies, NGOs, and technology providers using crowdsourcing to develop these solutions to global problems. It addresses the key challenges impacting organizations: 1. identifying more sustainable ways to design, distribute, transport, recycle, and repurpose products; and 2. discovering and implementing the systems needed to transform global economic growth, drive human prosperity, and replenish the planet's resources. *10 years of Frontiers in Plant Science*

the Neurosciences Stefanie Bodison, Lihle Qulu, Appiah, Rae Nishi, Lucina Q. Uddin, Marybel Robledo Gonzalez, Marguerite Matthews, Elaine Del Bel, 2025-09-30 International professional neuroscience organizations, granting agencies, and academic institutions have pledged their commitment to enhance diversity, equity, and inclusion with public statements of support and promises to increase training and funding opportunities for underrepresented scientists. At the same time, there is growing recognition that many human neuroscience studies to date have had insufficient representation of the rich tapestry of diversity across the globe, resulting in demographically skewed samples upon which significant medical protocols

pharmacological dosing recommendations and governmental policies have been shaped Finally much of the inquiry and analyses of potential variance across diverse groups in the neurosciences has taken a hegemonic view with little attention to the structurally racist biased and or colonialist systems of oppression that are likely to undergird these potential variances As we move into the next decade of neuroscience research there is an urgent need to more equitably cite and include the voices of diverse cross disciplinary health equity researchers who can bring their decades long expertise to enhance our perspectives of justice equity diversity and inclusion in human neuroscience neuropharmacology computational neuroscience developmental neuroscience neurogenetics and neuroinformatic inquiries
