Critics, Ratings, and Society Grant Blank, 2006-10-10 How do we make choices in an information saturated world Prior studies often assume that the problem is coping with the volume of information They rarely ask how people judge the validity of new information But we are all forced to depend on secondary sources that no one has the time or resources to verify In Critics Ratings and Society Grant Blank confronts these issues through an investigation of independent evaluations and reviews Reviews are widespread they rank products ranging from books and films to automobiles and computers They are important not just because they influence success and failure of products they also make or break reputations and careers and often play a critical role in stratification power and status Reviews are shaped by the interaction of media editors product makers and consumers into credible cultural objects These are processed into two types of rating systems connoisseurial reviews that depend on the unique skills and experience of a single reviewer a connoisseur and procedural reviews that are based on the results of tests well defined procedures that allow reviewers to rank groups of similar products Both rating systems construct hierarchies of products Blank develops a new theory explaining the circumstances where economic concerns like price are overshadowed by review constructed hierarchies When this happens culture constructs markets He argues that review constructed hierarchies are widespread as a consequence of inherent structural characteristics of contemporary capitalism and as a result reviews will become more important in the future You Should Test That Chris Goward, 2012-12-21 Learn how to convert website visitors into customers Part science and part art conversion optimization is designed to turn visitors into customers Carefully developed testing procedures are necessary to help you fine tune images headlines navigation colors buttons and every other element creating a website that encourages visitors to take the action you seek This book guides you through creating an optimization strategy that supports your business goals using appropriate analytics tools generating quality testing ideas running online experiments and making the adjustments that work Conversion optimization is part science and part art this guide provides step by step guidance to help you optimize your website for maximum conversion rates Explains how to analyze data prioritize experiment opportunities and choose the right testing methods Helps you learn what to adjust how to do it and how to analyze the results Features hands on exercises case studies and a full color insert reinforcing key tactics Author has used these techniques to assist Fortune 500 clients You Should Test That explains both the why and the how of conversion optimization helping you maximize the value of your website *Editor's pick e-book: highlighted research from Frontiers in Computational Neuroscience* 2025 Misha Tsodyks, Si Wu, 2025-06-27 Frontiers in Computational Neuroscience is a multidisciplinary journal that focuses on the theoretical modeling of brain function and encourages multidisciplinary interactions between theoretical and experimental neuroscience Our mission aligns closely with advancing global health and wellness goals particularly the United Nations Sustainable Development Goal 3 good health and well being by promoting a deeper understanding of brain

function and fostering research and collaboration in the field This contributes to the development of new knowledge and technologies that can potentially improve mental health neurological disorders and overall well being aligning with the broader goal of ensuring healthy lives and promoting well being for all at all ages Here we are pleased to introduce this Theme book entitled Research Highlights from Frontiers in Computational Neuroscience 2024 curated by our esteemed Chief Editors of Frontiers in Computational Neuroscience This collection honors the remarkable contributions of authors who have furthered our understanding of computational neuroscience through innovative and impactful research The work presented here spotlights the broad diversity of exciting research performed across the journal We hope you enjoy our selection of key articles We also thank all authors editors and reviewers of Frontiers in Computational Neuroscience for their contributions to our journal and look forward to another exciting year in 2025

Chemical Physics and Physical Chemistry Editor's Pick 2024 Malgorzata Biczysko,2025-01-02 We are pleased to introduce Frontiers in Chemistry Chemical Physics and Physical Chemistry Editor s Pick 2024 This collection showcases the most well received spontaneous articles from the past couple of years and has been specially handpicked by our Chief Editor The work presented here highlights the broad diversity of research performed across the section and aims to spotlight the main areas of interest All research presented here displays strong advances in theory experiment and methodology with applications to compelling problems

Pushing Frontiers - Imaging For Photon Science Jiaguo Zhang,Iain Sedgwick,Cornelia B. Wunderer,2024-12-24 Developments of cutting edge X ray imaging detectors are largely driven by experiments at the large photon science facilities i e the synchrotron radiation sources and free electron lasers FELs which enable a wealth of investigations in physics material science biology chemistry environmental sciences and beyond The next generation radiation sources namely diffraction limited storage rings DLSR and high repetition rate FELs operated in the continuous wave CW mode not only offer brilliant opportunities for research but also pose new challenges and requirements for the X ray detectors required to exploit them fully Examples include the high count rate capability required at the DLSRs the ultra high continuous frame rate and data throughput at the FELs and a broad photon energy range from tens of eV to hundreds of keV spanned by the facilities In order to meet the new requirements posed by the most advanced photon science facilities envisioned or already under development around the world today various novel photon detection and imaging concepts are being investigated and detector technologies are advancing fast The goal of this research topic is to address the challenges and discuss the critical problems encountered in imaging systems for photon science including but not limited to sensing materials ASICs readout electronics detector systems and data reduction Moreover it will encompass a discussion of the development strategies

technological advances and recent achievements of each subject thereby facilitating the realization of complete concepts for novel imaging systems as well as further developments of individual detector technologies **InfoWorld** ,1992-08-03

Foods, Dietary Supplements, and Herbal Products Treating the Diseases of the 21st Century: Moving from Traditional to Scientific Research, volume II Ana Sanches Silva,Neha Garg ,Shivraj Hariram Nile,2025-10-28

Given the outstanding impact of Foods Dietary Supplements and Herbal Products Treating the Diseases of the 21st Century Moving from Traditional to Scientific Research Frontiers in Nutrition is happy to launch Volume II of this successful Research Topic Nutraceuticals encompassing foods dietary supplements and herbal products have emerged as pivotal elements in the prevention and treatment of diseases in the 21st century These products offer significant advantages over conventional medicine such as minimizing side effects and serving as natural dietary supplements The nutraceutical industry has witnessed rapid growth particularly in the sectors of natural herbal products and dietary supplements which are regulated by the Food and Drug Administration FDA to ensure safety Despite their potential the scientific evidence supporting the efficacy of these products varies widely This disparity underscores the need for rigorous scientific investigation to validate their health benefits and integrate them effectively into modern medical treatment paradigms The cross cultural use of plants in traditional medicine highlights the importance of ethnobotanical and ethnomedical studies in informing drug development and identifying bioactive compounds This research topic aims to bridge the gap between traditional knowledge and scientific research in the field of nutraceuticals By exploring the medical and health benefits of foods dietary supplements and herbal products the research seeks to provide robust scientific evidence to support their use in treating and preventing diseases

Specific objectives include investigating the effects of food diversity on health understanding the transition from traditional to scientific nutraceutical research and evaluating the role of natural products in disease treatment The research will also address the processing and functionality of these products their role in traditional medicine and the impact of digital marketing on their supply and demand To gather further insights into the integration of nutraceuticals into modern healthcare we welcome articles addressing but not limited to the following themes Food diversity and its effect on consumption and health Nutraceutical research from traditional to the scientific revolution Dietary supplements of natural origin in the treatment of disease conditions Processing and functionality of natural products Traditional natural products and their role in the treatment of diseases When food becomes medicine in the treatment of disease conditions Medicinal plants diversity and functionality Digital marketing of traditional natural products meeting the supply and demand
